Introduction

Agricultural Statistics is published each year to meet the diverse needs for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use.

Inquiries concerning more current or more detailed data, past and prospective revisions, or the statistical methodology used should be addressed directly to the agency credited with preparing the table. Most of the data were prepared or compiled in the U.S. Department of Agriculture. A few tables were prepared in other Government agencies.

The historical series in this volume have been generally limited to data beginning with 1949 or 1950 or the most recent 10 years. However, many of the series carry a reference in the source note to the table in Agricultural Statistics, 1962, where comparable data for earlier years can be found. In the 1962 issue, historical tables showing totals for the United States begin with 1866 for the principal crops and with 1867 for January 1 livestock numbers and most other basic tables showing national totals begin with 1929, 1934, 1939 or 1944 (livestock and poultry tables 1 year later) depending in part on the relative need for a long series.

These two publications should provide data for enough years to meet the needs of most users.

Agricultural data for Alaska and Hawaii are included in the appropriate tables, where available. Only limited information is available in Alaskan agricultural production. Statistics for Hawaii are generally given in separate tables in the commodity chapters, or in chapter XI.

U.S. foreign agricultural trade statistics include Government as well as non-Government shipments of merchandise from all the United States and territories to foreign countries. They do not include U.S. shipments to the U.S. Armed Forces abroad for their own use or shipments between the States and U.S. territories. The world summaries of production and trade of major farm products are prepared by the U.S. Department of Agriculture from reports of the U.S. Department of Commerce, official statistics of foreign Governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers and the result of office research.

Three types of data are included in this volume. Statistics presented in many of the tables represent actual counts of the items covered. Most of the statistics relating to foreign trade and to Government programs, such as numbers and amounts of loans made to farmers, and amounts of loans made by the Commodity Credit Corporation, etc., are data of this type. A large number of other tables, however, contain data that are estimates made by the Department of Agriculture, which in many cases are supplemented by a third type of data obtained in census enumerations.

The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current State and national totals and averages. They are based on "bench mark" data supplied by the Censuses of Agriculture taken every 5 years and on sample data supplied by farmers and by people who do business with farmers, together with check data from other sources. Being estimates, they are subject to revisions as more data become available from commercial or Government sources. Unless otherwise indicated, the totals for the United States shown in the

various tables on acreage, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude States for which no official estimates are compiled.

For census years, many tables carry both census totals and this Department's estimates. Generally, where there are appreciable differences between the census totals and this Department's final estimates, the processes of checking and revising estimates have indicated that some sources provide more nearly complete information about some items than the census has been able to obtain. For example, this Department's estimates of tobacco production can be considered more precise than census totals, because the estimates are revised in line with actual production as shown independently by Internal Revenue records and State records of tobacco sales. Sugar beet and sugarcane production and acreage estimates are adjusted to quantities actually reported by sugar factories. Check information on peanuts and rice is available from processors for areas sometimes including several States. In a number of other instances allowances have been made for known incompleteness of coverage by the census.

For livestock and poultry, the Department's estimates of inventory numbers relate to January 1. Most recent censuses have not enumerated numbers on that date. The 1945 census was taken as of January 1, but with the trying wartime conditions, was delayed over a considerable length of time in a number of States with the result that reported inventory numbers did not always represent the actual January 1 inventory. The 1950 census was taken as of April 1 and the 1954 and 1959 censuses were taken in October and November. These situations have made it necessary to adjust census totals to a January 1 equivalent basis, taking into account changes that occurred between the January 1 date and the actual date of enumeration.

DEFINITIONS

"Farm value" as applied to crops in the various tables, is derived by multiplying production by the estimated season average price received by farmers for that portion of the commodity actually sold. In the case of fruits and vegetables, however, quantities not harvested because of low prices or other economic factors are excluded from the computation of farm value. The term is used in the inventory tables on livestock and poultry to mean value of the number of head on farms on January 1. It is derived by multiplying the number of head by an estimated value per head as of that date.

The word "Year" (alone) in a column heading means calendar year. "Ton" when used in this book without qualifications means a short ton of 2,000 pounds.

WEIGHTS, MEASURES, AND CONVERSION FACTORS

The following table on weights, measures, and conversion factors covers the most important agricultural products, or the products for which such information is most frequently asked of the U.S. Department of Agriculture. It does not cover all farm products nor all containers for any one product.

The information has been assembled from various sources within the Department and from State schedules of legal weights. For most products, particularly fruits and vegetables, there is a considerable variation in weight per unit of volume, due to differences in variety or size of commodity, condition and tightness of pack, degree to which the container is heaped, etc.

Effort has been made to select the most representative and fairest average for each product. For those commodities which develop considerable shrinkage, the point of origin weight or weight at harvest has been used.

The approximate or average weights, as given in this table do not necessarily have official standing as a basis for packing or as grounds for settling disputes. Not all of them are recognized as legal weight. The table was prepared chiefly for use of workers in the U.S. Department of Agriculture who have need of conversion factors in statistical computations.

Apples.....	1 pound dried.....	7 pounds fresh; beginning 1943, 8 pounds fresh
Do.....	1 pound chops.....	5 pounds fresh
Do.....	1 barrel.....	3 boxes or 3 bushel baskets
Do.....	1 case canned ³⁸	1.4 bushels fresh
Applesauce.....	1 case canned ³⁹	1.2 bushels fresh
Apricots.....	1 pound dried.....	5½ pounds fresh
Barley.....	1 metric ton ³⁹	45,9296 bushels
Barley flour.....	100 pounds.....	4.69 bushels barley
Beans, lima.....	1 pound shelled.....	2 pounds unshelled
Beans, snap or wax.....	1 case canned ⁴⁰	0.010 tons fresh
Buckwheat flour.....	100 pounds.....	3.47 bushels buckwheat
Calves.....	1 pound live weight.....	0.555 pounds dressed weight, since 1952
Cattle.....	do.....	0.549 pounds dressed weight, since 1952
Cane sirup.....	1 gallon.....	5 pounds sugar
Cherries, sour.....	1 case canned ³⁸	0.023 tons fresh
Chickens.....	1 pound live weight.....	0.72 pound ready-to-cook weight
Corn.....	1 metric ton ³⁹	39,368 bushels
Corn, shelled.....	1 bushel (56 lbs.).....	2 bushels (70 pounds) of husked ear corn
Corn, sweet.....	1 case canned ⁴⁰	0.038 tons fresh
Cornmeal:		
Degermed.....	100 pounds.....	3.16 bushels corn, beginning 1946
Nondegermed.....	do.....	2 bushels corn, beginning 1946
Cotton.....	1 pound ginned.....	3.26 pounds seed cotton including trash ⁴¹
Cottonseed meal.....	1 pound.....	2.10 pounds cottonseed
Cottonseed oil.....	do.....	5.88 pounds cottonseed
Dairy products:		
Butter.....	1 pound.....	21.1 pounds milk
Cheese.....	do.....	10 pounds milk
Condensed milk, whole.....	do.....	2.3 pounds milk
Dry cream.....	do.....	19 pounds milk
Dry milk, whole.....	do.....	7.6 pounds milk
Evaporated milk, whole.....	do.....	2.14 pounds milk
Malted milk.....	do.....	2.6 pounds milk
Nonfat dry milk.....	do.....	11 pounds liquid skim milk
Ice cream ⁴²	1 gallon.....	15 pounds milk
Ice cream ⁴³ (eliminating fat from butter and concentrated milk).....	1 gallon.....	12 pounds milk
Eggs.....	1 case.....	47 pounds
Eggs, shell.....	do.....	39.5 pounds frozen or liquid whole eggs
Do.....	do.....	10.8 pounds dried whole eggs
Figs.....	1 pound dried.....	3 pounds fresh in California; 4 pounds fresh elsewhere
Flaxseed.....	1 bushel.....	About 2½ gallons oil
Grapefruit, Florida.....	1 case canned juice ⁴⁰	0.83 box fresh fruit
Hogs.....	1 pound live weight.....	0.569 pounds dressed weight excluding lard, since 1952
Linseed meal.....	1 pound.....	1.56 pounds flaxseed
Linseed oil.....	1 pound.....	2.80 pounds flaxseed
Malt.....	1 bushel (34 lbs.).....	1 bushel barley (48 lbs.)
Maple sirup.....	1 gallon.....	8 pounds maple sugar
Nuts:		
Almonds, imported.....	1 pound shelled.....	3¼ pounds unshelled
Almonds, California.....	do.....	2.22 pounds unshelled through 1949; 2 pounds thereafter
Brazil.....	do.....	2 pounds unshelled
Cashews.....	do.....	4.55 pounds unshelled
Chestnuts.....	do.....	1.19 pounds unshelled
Filberts.....	do.....	2.22 pounds unshelled through 1949; 2.5 pounds thereafter
Pecans:		
Seedling.....	do.....	2.78 pounds unshelled
Improved.....	do.....	2.50 pounds unshelled
Pignolias.....	do.....	1.3 pounds unshelled
Pistachios.....	do.....	2 pounds unshelled
Walnuts:		
Black.....	do.....	8¼ pounds unshelled
Persian (English).....	do.....	2.56 pounds unshelled
Oats.....	1 metric ton ³⁹	68,8944 bushels
Oatmeal.....	100 pounds.....	7.6 bushels oats, beginning 1943
Oranges, Florida.....	1 case canned juice ⁴⁰	0.63 box fresh
Peaches, California, freestone.....	1 pound dried.....	5½ pounds fresh through 1918; 6 pounds fresh for 1919-28; and 6½ pounds fresh from 1929 to date
Peaches, California, clingstone.....	do.....	7½ pounds fresh
Peaches, clingstone.....	1 case canned ³⁸	1.0 bushels fresh
Do.....	do.....	0.0230 tons fresh
Peanuts.....	1 pound shelled.....	1½ pounds unshelled
Pears.....	1 pound dried.....	5½ pounds fresh
Pears, Bartlett.....	1 case canned ³⁸	1.1 bushels fresh
Do.....	do.....	0.026 tons fresh
Peas, green.....	1 pound shelled.....	2½ pounds unshelled
Do.....	1 case canned ⁴⁰	0.010 tons fresh (shelled)

See footnotes on page VIII.

CONVERSION FACTORS—Continued

Commodity	Unit	Approximate equivalent
Prunes.....	1 pound dried.....	2½ pounds fresh in California; 3 to 4 pounds fresh elsewhere
Raisins.....	1 pound.....	4 pounds fresh grapes
Rice, milled (excluding brewers).....	100 pounds.....	152 pounds rough or unhulled rice
Rye.....	1 metric ton ³⁹	39,368 bushels
Rye flour.....do.....	2.23 bushels rye beginning 1947
Sheep and lambs.....	1 pound live weight.....	0.477 pounds dressed weight since 1952
Soybeans.....	1 metric ton ³⁹	36,7437 bushels
Soybean meal.....	1 pound.....	1.28 pounds soybeans
Soybean oil.....do.....	5.45 pounds soybeans
Sugar.....	1 ton raw.....	0.9346 tons refined
Tobacco.....	1 pound farm-sales weight.....	Various weights of stemmed and unstemmed, according to aging and the type of tobacco. (See circular 435, U. S. Dept. of Agr.)
Tomatoes.....	1 case canned ⁴⁰	0.027 tons fresh
Turkeys.....	1 pound live weight.....	0.80 pounds ready-to-cook weight
Wheat.....	1 metric ton ³⁹	36,7437 bushels
Wheat flour.....	100 pounds.....	2.30 bushels wheat ⁴⁸
Wool, domestic apparel shorn.....	1 pound greasy.....	0.45 pounds scoured
Wool, domestic apparel pulled.....do.....	0.75 pounds scoured

¹ Standard bushel used in the United States contains 2,150.42 cubic inches; the gallon, 231 cubic inches; the cranberry barrel, 5,826 cubic inches; and the standard fruit and vegetable barrel, 7,056 cubic inches. Such large-sized products as apples and potatoes sometimes are sold on the basis of a heaped bushel, which would exceed somewhat the 2,150.42 cubic inches of a bushel basket level full. This also applies to such products as sweet-potatoes, peaches, green beans, green peas, spinach, etc.

² Approximate inside dimensions, 10½ by 11½ by 18 inches.

³ Approximate inside dimensions, 11 by 13 by 17 inches.

⁴ Approximate inside dimensions, 4½ by 12½ by 16½ inches.

⁵ Approximate inside dimensions, 4½ by 16 by 16½ inches.

⁶ Approximate inside dimensions, 9¾ by 11 by 20½ inches.

⁷ Approximate dimensions, 4½ by 13½ by 16½ inches.

⁸ Approximate inside dimensions, 13 by 12 by 32.

⁹ Approximate inside dimensions, 8 by 12 by 22 inches.

¹⁰ Inside dimensions vary. Common sizes are 13 by 13 by 22½ inches, and 13 by 16½ by 23 inches.

¹¹ Approximate inside dimensions, 13 by 18 by 21½ inches.

¹² Approximate inside dimensions, 13 by 13 by 22½ inches.

¹³ This is the weight commonly used in trade practices, the actual weight varying according to temperature conditions.

¹⁴ Approximate inside dimensions, 9¾ by 16 by 20 inches.

¹⁵ Approximate inside dimensions, 4½ by 11½ by 14 inches.

¹⁶ The standard weight of 70 pounds is usually recognized as being about 2 measured bushels of corn, husked, on the ear, because it requires 70 pounds to yield 1 bushel, or 56 pounds, of shelled corn.

¹⁷ For statistical purposes the bale of cotton is 500 pounds or 480 pounds net weight. Prior to Aug. 1, 1946, the net weight was estimated at 478 pounds. Actual bale weights vary considerably, and the customary average weights of bales of foreign cotton differ from that of the American square bale.

¹⁸ This is the average weight of cottonseed, although the legal weight in some States varies from this figure of 32 pounds.

¹⁹ Approximate inside dimensions, 9¾ by 10½ by 15 inches.

²⁰ 45 pounds prior to 1952.

²¹ Approximate inside dimensions, 1¾ by 11 by 16½ inches.

²² Approximate inside dimensions, 12 by 12 by 24 inches.

²³ Approximate inside dimensions, 11½ by 11½ by 24 inches.

²⁴ In California and Arizona from 1942 through 1953 the net weights as used by this Department were 77 pounds for oranges, 79 pounds for lemons, and 65 pounds for Desert Valleys grapefruit. Grapefruit in California areas other than the Desert Valleys averaged 68 pounds. The new weights effective in 1954 reflect the shift from the "box" to the ½ box carton as the container used.

²⁵ Approximate inside dimensions, 10¼ by 10, 1¼ by 16½ inches for oranges or lemons, and 9¾ by 10, 1¼ by 16½ inches for grapefruit.

²⁶ Approximate inside dimensions, 5¾ by 13½ by 16½ inches.

²⁷ Approximate inside dimensions, 4¾ by 16 by 16½ inches.

²⁸ Approximate inside dimensions, 7¾ by 16 by 21½ inches.

²⁹ Approximate inside dimensions, 9¾ by 13 by 25 inches.

³⁰ Approximate inside dimensions vary. Common size is 4½ by 11½ by 16½ inches.

³¹ Approximate inside dimensions, 8¾ by 11½ by 18 inches.

³² Approximate inside dimensions, 13¾ by 11 by 22 inches.

³³ Approximate inside dimensions, 12 by 10½ by 33 inches.

³⁴ Inside dimensions vary. Ranges from 4 by 16 by 16½ inches to 6 by 16 by 16½ inches.

³⁵ Includes both sorghum grain (kafr, milo, hegari, etc.) and sweet sorghum varieties.

³⁶ This average of 55 pounds indicates the usual weight of sweetpotatoes when harvested. Much weight is lost in curing or drying and the net weight when sold in terminal markets may be below 55 pounds.

³⁷ Approximate inside dimensions, 9¾ by 9½ by 19½ inches.

³⁸ Case of 24 number 2½ cans.

³⁹ 1 metric ton is equivalent to 2204.6 pounds.

⁴⁰ Case of 24 number 2 cans.

⁴¹ Varies widely by method of harvesting.

⁴² The milk equivalent of ice cream per gallon is 15 pounds. Reports from plants indicate about 81 percent of the butterfat in ice cream is from milk and cream, the remainder being from butter and concentrated milk. Thus the milk equivalent of the milk and cream in a gallon of ice cream is about 12 pounds.

⁴³ This is equivalent to 4.51 bushels of wheat per barrel (196 pounds) of flour and has been used in conversions beginning July 1, 1957. Because of changes in milling processes, the following factors per barrel of flour have been used for earlier periods: 1790-1870, 5 bushels; 1880-1908, 4.75 bushels; 1909-17, 4.7 bushels; 1918 and 1919, 4.5 bushels; 1920, 4.6 bushels; 1921-44, 4.7 bushels; July 1944-Feb. 1946, 4.67 bushels; March 1946-Oct. 1946, average was about 4.31 bushels; and Nov. 1946-June 1957, 4.57 bushels.

CHAPTER I

STATISTICS OF GRAIN

This chapter contains tables for wheat, rye, rice, buckwheat, corn, oats, barley, sorghum grain, and feed stuffs. Estimates are given of acreage, production, farm disposition, prices, farm value, stocks, foreign production and trade, and price support operations. The United States tables on acreage, yield, production, value, and foreign trade for the most part extend back to 1949. Data on earlier years are available from the 1962 Agricultural Statistics. Estimates in greater detail are published regularly by the Crop Reporting Board for commodities treated in this chapter.

Tables on popcorn are placed with "minor field crops". Corn sugar and corn sirup, however, are included in the corn tables.

The table showing acreage of corn planted with hybrids has been dropped, since the series has been discontinued.

Table 1.—Wheat: Acreage, yield, production, value, and foreign trade, United States, 1949-62

Year	Acreage seeded ¹	Acreage harvested	Yield per harvested acre	Production	Season average price per bushel received by farmers ²	Farm value	Average price per bushel, year beginning July, at—		Foreign trade, including flour, year beginning July ³

¹ Includes acreage seeded in preceding fall for harvest in the year shown.

² Obtained by weighting State prices by quantity sold. Includes an allowance for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

³ No. 2 Hard and Dark Hard Winter, computed by weighting selling prices by number of carlots sold, as reported in the Kansas City Grain Market Review.

⁴ No. 1 Dark Northern Spring, computed by weighting selling prices by number of carlots sold as reported in the Minneapolis Daily Market Record.

⁵ Compiled from reports of the U.S. Department of Commerce. Wheat flour converted to grain equivalent on the following basis: 1949-June 30, 1957, 2.33; and July 1, 1957 to date, 2.30 bushels of grain to 100 pounds of flour.

⁶ Includes flour milled from imported wheat. Excludes exports for relief or charity by individuals and private agencies.

⁷ Includes wheat imported for milling in bond and subsequent export.

⁸ Domestic exports minus imports for consumption.

⁹ Excludes some minor producing States and parts of other States where wheat was not asked separately.

¹⁰ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1866-1948 in *Agricultural Statistics, 1962*, table 1.

¹ Acreage seeded in preceding fall for winter wheat.

² Preliminary.

³ Includes "red durum." Minnesota, North Dakota, and South Dakota beginning in 1953. Montana added in 1954 and California in 1956.

⁴ Includes small quantities of durum wheat grown in States other than those specified in footnote 3.

⁵ Total of acreage seeded to winter wheat and all spring wheat.

⁶ Total acreage seeded less an allowance for winter wheat acreage abandoned and later reseeded to spring wheat for harvest in the same crop year. Occurs principally in the Pacific Northwest.

Statistical Reporting Service. Winter wheat and spring wheat data for 1934–52 in *Agricultural Statistics, 1962* table 2.

¹ Acreage seeded in preceding fall for winter wheat.

² Preliminary.

³ Less than 10 years.

⁴ Includes "red durum". Small additional quantities of durum wheat are grown in other than the States shown here, but are included with "other spring" wheat.

Statistical Reporting Service.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1962 is combined with preliminary forecasts for the Southern Hemisphere harvests which began late in 1962 and ended early in 1963.

² Refers to harvested areas as far as possible.

³ Preliminary.

⁴ Yield per acre calculated from acreage and production data shown.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ U. S. S. R. official reports of production appear to be over estimates and have been adjusted.

⁷ Production on European holdings only.

⁸ Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U. S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Imports of wheat of milling quality have been limited to a quota of 800,000 bushels per year since May 29, 1941, of which 795,000 may come from Canada. Quantities in excess of the 800,000-bushel quota represent quota-free imports of seed wheat authorized by Presidential Proclamation 2550, April 16, 1942.

² Imports of flour have been limited to a quota of 4,000,000 pounds per year since May 29, 1941, of which 3,815,000 pounds may come from Canada (total quota is 93,200 bushels, wheat equivalent). Flour for special experimental purposes may be imported ex-quota. Excludes flour "free for export".

³ Consists of macaroni, spaghetti and similar products, wheat cereal breakfast foods, bread and biscuits, semolina and prepared mixes.

⁴ Reported by the National military establishments.

⁵ Usually all from imported wheat, although in some years small quantities of United States wheat were added.

⁶ Includes exports for relief or charity by individuals and private agencies.

⁷ Preliminary.

¹ Represents actually recorded sales by signatory exporting countries to signatory importing countries during August 1961–July 1962 under the terms of the International Wheat Agreement.

² Less than 500 bushels.

³ Includes in the case of the Netherlands, purchases by the Kingdom of Netherlands–outside–Europe, in the case of Portugal, purchases by Portuguese Overseas Provinces, and in the case of the United Kingdom, purchases by United Kingdom territories.

⁴ Includes both northern region and southern region formerly known as Syria and Egypt respectively.

Agricultural Stabilization and Conservation Service.

¹ Owned by Commodity Credit Corporation and stored in bins or other storage owned or controlled by CCC; also CCC wheat in transit. Other Commodity Credit Corporation-owned wheat included in the estimates by positions.

² Includes full-duty wheat, wheat imported for feed, and dutiable flour and other products in terms of wheat. Excludes wheat imported for milling in bond and export as flour.

³ Included with "Interior mill, elevator, and warehouse."

⁴ Preliminary.

⁵ Includes flour and other products in terms of wheat.

⁶ Food use is computed as follows: Total grind (commercial and noncommercial) less exports and shipments of flour and other wheat products, less military procurement, plus estimated breakfast food produced outside the flour milling industry, plus dutiable imports of flour and other wheat products.

⁷ Quantity of wheat ground into granular flour for alcohol production together with wheat grain used for that purpose.

⁸ Balancing item; roughly approximates total use as feed, including that used in commercial feed as well as that fed on farms.

⁹ Includes procurement for both military exports and for military food use; military takings for civilian feeding in occupied areas measured at time of procurement and not at time of shipment overseas.

¹⁰ Exports as here used, in addition to commercial exports, include USDA flour procurement as distinct from USDA deliveries for export. They exclude exports for civilian feeding by the military abroad which are included in military procurement. For the years 1952-54, actual exports, including those for civilian feeding in occupied areas (deliveries for export), of wheat, flour and other wheat products, in million bushels, were as follows: 317.8; 217.0 and 274.4. Includes exports for relief or charity by individuals and private agencies.

¹¹ Includes shipments to Alaska, Hawaii, and U.S. territories.

¹² Total disappearance plus year-end carryover account for total supply.

Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce and U.S. Department of Agriculture. Military procurement from the National Military Establishments. Data for 1939-51 in *Agricultural Statistics, 1962*, table 11.

¹ Markets are Chicago, Minneapolis, Kansas City, St. Louis, Omaha, and Duluth.

² Basic export selling price of Australian Wheat Board, bulk f.o.b. basis. Prices are for both International Wheat Agreement quota and "free" wheat.

³ Preliminary.

Economic Research Service. Compiled as follows: Grain Market News (AMS); Minneapolis Daily Market Record; St. Louis Daily Market Reporter; Kansas City Grain Market Review; Chicago Wall Street Journal New York Journal of Commerce; Canadian Grain Statistics; The Wheat Industry of Australia and Bureau of Labor Statistics Wholesale Price Bulletin. Minneapolis, St. Louis, Kansas City, and Chicago are weighted averages. Foreign prices are compiled in original currencies and units. Prices converted to cents per bushel of 60 pounds at current monthly rates of exchange as reported by the Federal Reserve Board. Data for 1939-52 in *Agricultural Statistics, 1962*, table 15.

Table 16.—Wheat: Price support operations, United States, 1953-63

Year beginning July	Support price		Season average price received by farmers	Amount put under support ²		Acquisitions under support program ³	Owned by OCC June 30
	Per bushel	Percent of parity ¹		Quantity	Percent of production		
	Dollars	Percent	Dollars per bushel	Million bushels	Percent	Million bushels	Million bushels
1953	2.21	91	2.04	553	47.1	486	775
1954	2.24	90	2.12	430	43.7	392	976
1955	2.08	83	1.98	318	34.0	277	951

¹ Includes rye sown in the spring of year shown.

² Obtained by weighting State prices by quantity sold. Includes an allowance for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

³ Averages of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.

⁴ Compiled from reports of the U.S. Department of Commerce. Rye malt converted to grain on the basis of 1 bushel of grain to 1 bushel of malt.

⁵ Rye malt not separately reported.

⁶ Includes rye malt.

⁷ Imports for consumption minus domestic exports with net exports shown by a minus sign.

⁸ Excludes some minor producing States and parts of other States where rye was not asked separately.

⁹ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1919-48 in *Agricultural Statistics, 1962*, table 17.

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1962 is combined with preliminary forecasts for the Southern Hemisphere harvests, which began late in 1962 and ended early in 1963.

² Refers to harvested areas as far as possible.

³ Preliminary.

⁴ Yield per acre calculated from acreage and production data shown.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ U.S.S.R. official reports of production appear to be over estimates and have been adjusted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Obtained by weighting State prices by quantity sold.

² Compiled from reports of the U.S. Department of Commerce. Buckwheat flour converted to grain equivalent on the basis of 7 bushels of grain to 1 barrel of flour.

³ Includes shipments under the Army Civilian Supply Program.

⁴ Domestic exports minus imports, with net imports shown by a minus sign.

⁵ Excludes some minor producing States.

⁶ Not separately reported, beginning January 1958.

⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1919-48 in *Agricultural Statistics, 1962*, table 34.

¹ Obtained by weighting State prices by quantity sold. Includes an allowance for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

² Compiled from reports of the Department of Commerce. Includes corn meal converted to grain equivalent on the basis of 3.16 bushels of grain to 100 pounds of meal.

³ Includes shipments under the Army Civilian Supply Program.

⁴ Domestic exports minus imports for consumption.

⁵ Preliminary.

¹ Preliminary.Statistical Reporting Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes. Data for 1934-52 in *Agricultural Statistics, 1962*, table 44.

FOOTNOTES FOR TABLE 41

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which follow; thus the crop harvested in the Northern Hemisphere in 1962 is combined with preliminary forecasts for the Southern Hemisphere harvest which begins early in 1963.² Refers to harvested area as far as possible.³ Preliminary.⁴ Yield per acre calculated from acreage and production data shown.⁵ New series covering corn for grain only.⁶ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.⁷ Dried corn only.⁸ Production on European holdings only. Allowances for native cultivation, not shown, are included in total for Africa.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Owned by CCC and stored in bins or other storage owned or controlled by CCC.

² Compiled from reports of the U.S. Department of Commerce. Imports include grain equivalent of cornmeal and flour; exports are grain only.

³ Terminal market and interior mill, elevator, and warehouse stocks combined beginning October 1, 1960.

⁴ Preliminary. Rough allowance for 1962-63 imports.

⁵ Estimated quantities (based on Census data) used in making prepared breakfast foods.

⁶ Estimated quantities used in producing cornmeal, flour, hominy grits and flakes for human food and for the production of fermented malt liquors. Based on reports of the U.S. Department of Commerce and the Internal Revenue Service. Does not include corn processed for livestock feed.

⁷ Starch, sirup, sugar, etc. Compiled from data of Price Waterhouse and Company and Dun and Bradstreet, New York.

⁸ Compiled from data of the Internal Revenue Service. Data derived by converting grain and products to bushel equivalent.

⁹ Based on acreage planted to the following crop.

¹⁰ Residual; includes some other minor uses and waste.

¹¹ Total disappearance, minus exports of corn and grain equivalent of products.

¹² Not reported beginning 1961.

Economic Research Service. Data for 1939-51 in *Agricultural Statistics, 1962*, table 47.

¹ Support to cooperators; non-cooperators received support as follows: 1956 crop at \$1.25 per bushel, 1957 crop at \$1.10 per bushel and 1958 crop at \$1.06 per bushel.

² Percentage of the parity price as of the beginning of the marketing year, except for 1963.

³ Represents loans made and purchase agreements entered into. Includes support extended on non-compliance production. Percent of production is on a grain basis.

⁴ Acquisitions from crop harvested in year indicated and not acquisitions during that period.

⁵ Preliminary.

⁶ Includes price support payment of 18 cents per bushel.

Agricultural Stabilization and Conservation Service.

¹ Estimates of seeded acreage relate to the total acreage of oats sown for all purposes, including oats sown in the preceding fall.

² Obtained by weighting State prices by quantity sold. Includes an allowance for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

³ Compiled from reports of the Chicago Board of Trade, average of daily quotations for No. 2 white, weighted by carlot sales.

⁴ Compiled from reports of the Department of Commerce. Oatmeal converted to grain equivalent on the basis of 1 bushel of grain to 13.17 pounds of meal.

⁵ Includes shipments under the Army Civilian Supply Program.

⁶ Includes "oats, unhulled, ground."

⁷ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁸ Excludes some minor producing States and parts of other States where oats were not asked separately.

⁹ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1866-1948 in *Agricultural Statistics, 1962*, table 52.

Statistical Reporting Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 52

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1962 is combined with preliminary forecasts for the Southern Hemisphere harvests which begin late in 1962 and end early in 1963.

² Refers to harvested areas as far as possible.

³ Preliminary.

⁴ Yield per acre calculated from acreage and production data shown.

⁵ Production and yield reported in bushels of 34 pounds.

⁶ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁷ U.S.S.R. official reports of production appear to be over estimates and have been adjusted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research, and related information.

¹ Estimates of seeded acreage relate to the total acreage of barley sown for all purposes, including barley sown in the preceding fall.

² Obtained by weighting State prices by quantity sold. Includes an allowance for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

³ Price of No. 3 barley, average of daily prices weighted by carlot sales, as reported in the Minneapolis Daily Market Record.

⁴ Compiled from reports of the U.S. Department of Commerce. Barley flour converted to grain equivalent on the basis of 22.032 pounds of flour to 1 bushel of grain. Barley malt converted to grain equivalent on the basis of 1 bushel of grain to 1 bushel of malt.

⁵ Includes shipments under the Army Civilian Supply Program.

⁶ Domestic exports minus imports for consumption. Net imports shown by a minus sign.

⁷ Excludes some minor producing States and parts of other States where barley was not asked separately.

⁸ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Data for 1924-48 in *Agricultural Statistics, 1962*, table 61.

Statistical Reporting Service. Disposition of the crop specified and not disposition within the marketing year. Estimates of farm disposition represent portions of the crop used or to be used for the designated purposes on farms where produced and do not include purchases by farmers from others for such purposes.

FOOTNOTES FOR TABLE 61

¹ Years shown refer to years of harvest in the Northern Hemisphere. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crop harvested in the Northern Hemisphere in 1962 is combined with preliminary forecasts for the Southern Hemisphere harvests which begin late in 1962 and end early in 1963.

² Refers to harvested areas as far as possible.

³ Preliminary.

⁴ Yield per acre calculated from acreage and production data shown.

⁵ Estimated totals, which in the case of production are rounded to millions, include allowances for any missing data for countries shown and for other producing countries not shown.

⁶ U.S.S.R. official reports of production appear to be over estimates and have been adjusted.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Owned by CCC and stored in bins or other storage owned or controlled by OCC. Additional CCC stocks are included in other off-farm positions.

² Compiled from reports of the U.S. Department of Commerce. Both imports and exports include grain equivalent of barley products.

³ Terminal market and interior mill, elevator, and warehouse stocks combined beginning October 1, 1960.

⁴ Preliminary. Rough allowance for 1962–63 imports.

⁵ Compiled from reports of the Internal Revenue Service. Includes small quantities of barley grain.

⁶ Principally for food uses.

⁷ Based on acreage seeded to the following crop.

⁸ Residual; includes other minor uses and waste.

⁹ Total disappearance, minus exports of barley grain and grain equivalent of malt exported.

Economic Research Service. Data for 1939–51 in *Agricultural Statistics, 1962*, table 66.

¹ Consumption data for most grains are measured at the processing level. Total consumption is the grain equivalent of the food products processed from the grains. Excludes quantities used for alcoholic beverages. The per capita civilian consumption is obtained by dividing the total apparent civilian consumption by the civilian population.

² Includes white, whole wheat, and semolina flour.

³ Rice consumption for year beginning August previous to the year stated. Table rice used by brewers excluded.

⁴ Excludes corn and corn products used in the production of alcoholic beverages. Total corn includes an allowance for the quantity used as hominy and grits and minor food uses.

⁵ Barley consumed in food products, excluding malt beverages, expressed in terms of grain equivalent. Includes quantities used as pearl barley, flour, malt extract, and other food products.

⁶ Malt equivalent of barley grain used for food.

⁷ Preliminary.

Economic Research Service. All figures are estimates based on data from the Price Waterhouse and Co., Dun and Bradstreet, New York, the U.S. Department of Commerce, the Internal Revenue Service, and other sources. Data for 1909-48 in *Agricultural Statistics, 1963*, table 72.

¹ Grain and sweet sorghums for all uses, including sirup.

² Includes both grain sorghums for grain and sweet sorghums for grain or seed.

³ Based on the reported price of grain sorghums. Obtained by weighting State prices by quantity sold. Includes an allowance made for loans unredeemed at the end of the crop marketing season and for quantities bought by the Government under purchase agreements when such transactions are of significant volume.

⁴ Dec. 1 price.

⁵ Dry weight.

⁶ Green weight.

⁷ Preliminary.

Statistical Reporting Service. Italic figures are census returns. Data for 1929-48 in *Agricultural Statistics, 1962*, table 73.

¹ Preliminary.

² For grain, includes an allowance for unredeemed loan and purchase agreement deliveries at the average rate. For forage, price is based on sales to December 1.

³ Based on the reported price of grain sorghums.

⁴ Less than 10-year average.

⁵ Dry weight for forage; green weight for silage.

Statistical Reporting Service.

¹ Includes dried skim milk, buttermilk, and whey for feed, but does not include any milk products fed on farms.

² Other mill products, not listed, are screenings, hominy and oat feeds, etc., for which no statistics are available.

³ Does not include wet sugar-beet pulp.

Agricultural Marketing Service. Prices of corn and oats at Kansas City, Chicago, and Minneapolis were computed by weighting selling prices by reported number of carlots sold. Prices of barley and grain sorghum at Kansas City and of barley at Chicago and Minneapolis are average of prices at the close of each day. Prices at San Francisco are the average of prices on one day each week. Data for 1939-51 in *Agricultural Statistics, 1962*, table 84.

¹ Based on prices of the following commodities at leading producing markets, weighted by average consumption: Soybean, cottonseed, linseed, copra, and peanut meal; tankage, meat and fish meal; bran, middlings, shorts and millrun; gluten and hominy feed; brewers' and distillers' dried grains; alfalfa meal; rice brans and feeding molasses.

Agricultural Marketing Service. Data for 1939-51 in *Agricultural Statistics, 1962*, table 85.

CHAPTER II

STATISTICS OF COTTON, SUGAR, AND TOBACCO

In addition to tables on cotton, sugar, and tobacco, this chapter includes tables on fibers other than cotton, sirups, sugar, honey, and beeswax. Most cottonseed data, however, are in the following chapter on oilseeds, fats, and oils.

Much of the information on cotton lint is given in terms of "running" bales. The term "running bale," when applied to weight, is the average weight of a bale as it comes from the gin, when applied to number, it is the number of bales actually ginned.

The table showing acreage, production, and price received by farmers for sorghum sirup has been dropped.

Table 84.—Cotton: Acreage, yield, production, value, and foreign trade, United States, 1949–62

¹ Census of Agriculture figures for all periods are in running bales. U.S. Department of Agriculture figures are in 500-pound gross-weight bales for all years.

² Gross weight price, including bagging and ties, except that extra long staple cotton is included at net weight. Includes allowance for loans unredeemed at date of maturity.

³ Prices for middling grades; $3/16$ -inch staple, through July 1956; 1-inch staple beginning August 1956.

⁴ Compiled from reports of the U.S. Department of Commerce. Equivalent bales of 500 pounds gross weight.

⁵ Excluding linters.

⁶ Preliminary.

⁷ Average price to April 1, 1963, including an allowance for unredeemed loans.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Production figures conform with census annual ginning enumerations. Data for 1866–1943 in *Agricultural Statistics, 1962*, table 86.

Table 86.—Cotton: Price support operations for American upland, United States, 1953–63

Year beginning August	Support price ¹		Season average price received by farmers	Amount put under support ²		Acquisitions under support program ³	Owned by CCC July 31
	Per pound	Percent of parity		Quantity	Percent of production		
	<i>Cents</i>	<i>Percent</i>	<i>Cents per lb.</i>	<i>1,000 bales</i>	<i>Percent</i>	<i>1,000 bales ⁴</i>	<i>1,000 bales ⁴</i>
1953	30.80	90	32.10	6,767	41.6	4,675	1,129
1954	31.58	90	33.52	2,273	16.7	1,610	1,661
1955	31.70	90	32.27	7,230	49.9	6,024	5,952
1956	29.34	82	31.63	4,829	36.9	3,676	4,829
1957	28.81	78	29.46	3,612	33.4	2,420	937
1958	31.23	81	33.09	6,776	59.7	5,993	984
1959	⁵ 30.40	⁵ 80	31.56	8,952	62.0	8,652	4,967
1960	⁶ 28.97	⁶ 75	30.08	8,320	58.6	7,790	1,678
1961	31.88	82	32.80	4,833	33.9	3,245	1,449
1962	31.88	82	⁶ 32.20	⁶ 6,568	⁶ 44.5		
1963	⁷ 31.70	⁷ 79					

¹ Basis $\frac{3}{8}$ -inch middling through 1960, average of crop for later years. The percent of the parity price is as of the beginning of the marketing year, except 1959, 1960, 1961 and 1963 as of Feb. 1, and 1962 as of Jan. 1.

² Includes loans made and direct purchases.

³ Acquisitions from crop harvested in year indicated.

⁴ Running bales.

⁵ For cotton grown by farmers electing choice A acreage allotments. Corresponding support level for choice B for 1959 is 24.70 cents which is 65 percent of parity; for 1960 it is 23.18 cents which is 60 percent of parity.

⁶ Preliminary.

⁷ Minimum average support required to be announced in advance.

Agricultural Stabilization and Conservation Service.

FOOTNOTES FOR TABLE 85

¹ Preliminary.

² Bales ginned, as reported by the U.S. Department of Commerce with an allowance made for interstate movement of seed cotton for ginning, rounded to thousands, by States. Cotton produced but not ginned is not included in production.

³ Gross weight price, including bagging and ties, except that American-Egyptian cotton is included at net weight. Includes allowance for loans unredeemed at date of maturity.

⁴ Average price to April 1, 1963.

⁵ Sums of acreage and production for "other States" rounded for inclusion in U.S. totals. Estimates for these States, except Kansas where cotton production is insignificant, are shown separately.

⁶ Included in State and U.S. totals.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 87

¹ Years refer to crop years beginning August 1 in which major portion of crop was harvested.

² Preliminary.

³ Production in bales of 480 pounds net.

⁴ Includes estimates for minor-producing countries not listed above and allowances for countries where data are not yet available.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

1955.....	93.2	32.6			

¹ Computed by weighting the quantity in each grade by the 1937-39 average price per pound for such grade of 1 $\frac{1}{8}$ inch staple. Converted to an index with "middling white" equaling 100. For 1958 and subsequent years, constants for plus, "light spotted" and "light gray" set at mid-points between full grade weights.

² Averages calculated on numerical equivalents of the staple-length designation. For example $\frac{1}{8}$ inch=28, $\frac{1}{4}$ inch=29, etc. Averages are in terms of thirty-seconds inches.

Agricultural Marketing Service. Data for 1928-48 in *Agricultural Statistics, 1962*, table 94.

¹ Computed by weighting the quantity in each grade by the 1937-39 average price per pound for such grade of 1½ inch staple. Converted to an index with "middling white" equaling 100. For 1958 and subsequent years, constants for "plus," "light spotted" and "light gray" set at mid-points between full grade weights.

² Average calculated on numerical equivalents of the staple-length designations. For example, ⅝=28, ⅜=29 etc.

³ Illinois and Kentucky 1957-58; Illinois, Kentucky and Nevada 1959-61.

¹ The cost to consumers for 25 items of clothing and household textiles divided by the number of pounds of lint cotton estimated to be required for their manufacture. Annual averages are simple averages of retail costs in March, June, September, and December.

² Estimated farm value of cotton of grades and staple lengths suitable for manufacture of the products, less allowance for value of salable spinning waste, divided by the number of pounds of cotton required. Farm value is based on average prices of cotton in central markets less one-half cent per pound estimated to be the difference between central-market price and price received by farmers.

Economic Research Service. Data for 1939-48 in *Agricultural Statistics, 1962*, table 106.

¹ Uncompressed in carload lots, f.o.b. mill points.

² Bales are running bales except imports, which are 500-pound bales, includes production at oilmills, gins, and other delinting plants. Beginning in 1959, "supply" items are principally in 600 pound gross weight bales and "distribution" items are in running bales.

³ Preliminary.

Agricultural Marketing Service. Supply and distribution figures compiled from reports of the U.S. Department of Commerce. Data for 1939-51 in *Agricultural Statistics, 1962*, table 107.

¹ Estimates for Southern Hemisphere Countries include unginced cotton.

² Preliminary.

³ Bales of 500 pounds gross.

⁴ Running bales.

⁵ Chad and Central African Republic.

⁶ Mostly U.S.S.R., Mozambique, and Nigeria.

⁷ Mostly China and Eastern Europe.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés, and Foreign Service Officers, results of office research and related information.

FOOTNOTES FOR TABLE 110

¹ Estimates for Southern Hemisphere countries include unginced cotton.

² Includes cotton destroyed or unaccounted for.

³ Bales of 500 pounds gross.

⁴ Running bales.

⁵ Ginnings in season of 14,860,000 bales, plus city crop of 65,000 bales.

⁶ Net imports after deduction of re-exports.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés, and Foreign Service Officers, results of office research and related information.

¹ Includes bags and bagging for cotton (new and second-hand), webbing, padding, carpets and rugs, and yarns.

² In some instances import statistics have been converted from yards to pounds on the basis of average weights.

³ Prices for raw jute are for native first marks, duty-paid.

⁴ Excludes Communist China, Manchuria, and U.S.S.R.; and excludes mesta and other substitutes wherever possible.

⁵ Prices for January-July from Daily Mill Stock Reporter.

⁶ Preliminary.

⁷ Raw abaca and manila cordage.

⁸ Prices for raw abaca are for Davao Grade I.

⁹ Sisal and henequen cordage.

¹⁰ Prices for raw sisal are for Haitian Grade A, compiled from New York Journal of Commerce.

Economic Research Service and Foreign Agricultural Service. Import data compiled from reports of the U.S. Department of Commerce; price data, except as noted, from reports of the U.S. Department of Labor. Production data prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information. Data for 1944-52 in *Agricultural Statistics, 1962*, table 112.

¹ Commercial seed production from fall plantings overwintered in the field.

² 5-year average.

³ 9-year average.

⁴ Includes 10,768 bags of multigerm seed produced on 312 acres. Multigerm seed amounted to only 11.5 percent of total production; and monogerm amounted to 88.5 percent.

Agricultural Research Service. Compiled from reports furnished by beet sugar companies and their subsidiaries engaged in sugar beet seed production.

¹ Includes Louisiana and Florida for all years, and Hawaii for 1960-62. Price and value not available for Hawaii. Separate data for Hawaii in table 126.

² The growth of 9 months in Louisiana and 12 months in Florida, and 18-24 months in Hawaii. Sugar campaign usually ends by December or early January in Louisiana and in Florida by March following the season of growth, and in Hawaii the harvest takes place throughout the year.

³ Prices do not include Government payments under the Sugar Act.

⁴ Raw value equals 96° raw sugar as defined in the Sugar Act of 1948.

⁵ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

⁶ Sirup production not included. See table 138.

⁷ Preliminary.

Statistical Reporting Service. Of the total sugar produced in Louisiana about 25 percent consists of direct consumption sugar, marketed "as made" without further refining. Data for 1924-48 in *Agricultural Statistics, 1962*, table 122.

¹ Preliminary.

² The growth of 9 months in Louisiana, 12 months in Florida, and 18-24 months in Hawaii. Sugar campaign usually ends by December or early January in Louisiana, in Florida by March following the season of growth, and in Hawaii the harvest takes place throughout the year. Yield of cane for sugar used in computing production for seed in Florida and Louisiana.

³ Does not include Government payments under the Sugar Act. The United States average for these payments excluding abandonment and deficiency payments amounted to \$1.19 per ton in 1961 and approximately \$1.17 in 1962. See table 119.

⁴ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.

⁵ Calculated on the basis that 100 pounds of raw sugar is required to produce 93.46 pounds of refined sugar.

⁶ Includes high-test molasses made from frozen cane.

⁷ Includes edible molasses.

Statistical Reporting Service.

SUGARCANE

¹ Raw value is the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.

² Crop year generally coincides with the calendar year except that small proportions of continental U.S. beet and cane sugar processings are produced early in the following year and that the Philippine crop year starts in October of the preceding year.

³ Raw sugar, as made.

⁴ Preliminary.

Agricultural Stabilization and Conservation Service. Data for 1934–48 in *Agricultural Statistics, 1962*, table 124.

1962 ³	229	109	90.6	9,844	1,120	228	57,611

¹ The growth of 18-24 months. Only a portion of the total acreage in cane is harvested each year. The harvest takes place throughout the year.

² Raw value is the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.

³ Preliminary.

Agricultural Stabilization and Conservation Service. Data for 1934-48 in *Agricultural Statistics, 1962*, table 127.

FOOTNOTES FOR TABLE 129

¹ Years shown are crop-harvesting years. Campaigns beginning not earlier than May of year shown, nor later than April of following year are included in the same crop year. The entire season's production of each country is credited to the May/April year in which harvesting and sugar production began.

² Preliminary.

³ Centrifugal sugar, as distinguished from noncentrifugal, includes cane and beet sugar produced by the centrifugal process, which is the principal kind moving in international trade.

⁴ Includes sugar from imported beets.

⁵ No sugar produced prior to 1961-62.

⁶ Production relates to calendar years for the first of the two years indicated in crop-year heading.

⁷ Includes Swaziland.

⁸ Includes Khandari amounting to about 15 percent of total.

⁹ Includes estimates for non-reporting countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

1962 ⁶	648	588	26.08	15,333	1,739	72	226	80,542

¹ Harvesting begins in October. The length of the growing season being about 11 months.

² Total harvested acreage includes acreage for both centrifugal and noncentrifugal sugar. The acreage for noncentrifugal sugar has been estimated on the assumption 1 acre of cane yields about 1.5 tons of noncentrifugal sugar for the year 1949.

³ Cane production divided by harvested acreage.

⁴ Prior to 1950 calculated cane production is the quantity of cane ground for centrifugal sugar, estimated on the basis of the reported yield of sugar per ton of cane. From 1950 to date the cane production is reported.

⁵ As reported prior to 1950 and from 1952 to 1957. Other years computed.

⁶ Preliminary.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information. Data for 1934-48 in *Agricultural Statistics, 1962*, table 128.

¹ Raw value is the equivalent in terms of 96° sugar as defined in the Sugar Act of 1948.

² Marketings under annual sugar requirements determinations pursuant to the Sugar Act of 1948, as amended include quota and since 1960 non-quota purchase sugar which replaces Cuban sugar. These comprise all sugar marketings except small amounts of ex-quota sugar for re-export and for livestock feed. Quota charges compensated by quota credits upon exportation excluded; such quota charges averaged 4,000 tons annually 1955–62. Charges to liquid sugar marketing quotas of Cuba and the Dominican Republic also excluded; such charges amounted to about 37,000 tons raw value equivalent annually, 1955–59, 34,000 tons in 1960, 3,000 tons from the Dominican Republic only in 1961, and less than 500 tons in 1962.

³ Less than 500 tons.

Agricultural Stabilization and Conservation Service.

Table 131.—Sugar, cane, raw:¹ Refiners' stocks, receipts, meltings and direct-consumption deliveries, continental United States, 1953–62²

1962.....	596	7,047	7,033	12	598

¹ Expressed in raw value, the equivalent in terms of 96° sugar, as defined in the Sugar Act of 1948.

² Since 1955 mainland cane processor-refiners' entire operation included; before 1955 stocks at raw sugar mills excluded.

³ Receipts include refiners' total offshore raw sugar receipts in continental U.S. ports, whether entered through the customs or held pending availability of quota, and raw cane sugar produced from sugarcane in the continental U.S.

⁴ Includes 22,000 tons delivered for export.

Agricultural Stabilization and Conservation Service. Data for 1939–52 in *Agricultural Statistics, 1962*, table 132.

FOOTNOTES FOR TABLE 132

¹ Puerto Rican direct consumption sugar and, before 1955, Hawaiian direct consumption sugar included in "Importers of direct consumption sugar"; the latter included in "Cane sugar refineries" since 1955. Stocks include sugar in bond and in customs custody and control.

² All sugars converted to refined basis.

³ Sugar for direct consumption only. Mainland cane sugar mills stocks and production for direct consumption not separately reported.

⁴ Deliveries include deliveries for export, either in the form of sugar or as sugar contained in manufactured products in thousand tons, as follows: 1953, 30; 1954, 27; 1955, 39; 1956, 114; 1957, 28; 1958, 56; 1959, 54; 1960, 43; 1961, 52.

Agricultural Stabilization and Conservation Service. Data for 1937–52 in *Agricultural Statistics, 1962*, table 133.

FOOTNOTES FOR TABLE 133

¹ All stock carryover dates, except for January and February 1, apply to the first year mentioned at the head of each column.

² Preliminary.

³ Less than 5 years.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Production harvested within the calendar year specified. Farm sales weight is about 10 percent above dry weight which is normally reported in trade statistics.

² Preliminary.

³ Includes estimates for Albania, Bulgaria, Czechoslovakia.

⁴ Less than 500 acres.

⁵ Includes missing data for countries listed.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ July 1 for fire-cured types 11-14 and cigar types 61 and 62; Oct. 1 for all other types.

² Farm-sales weight of exports is subject to revision. Exports by rehandling trade included in totals of types from which they are made.

³ Preliminary.

⁴ Puerto Rican crop planted in the fall of the year shown and harvested the following spring.

⁵ Includes approximately 360 acres of fire-cured wrapper.

⁶ Includes Perique.

Economic Research Service. Basic export data from the official reports of the Department of Commerce. Data for Puerto Rico from "Basic Statistics on Puerto Rico," Office of Puerto Rico. Data for 1949-57 in *Agricultural Statistics, 1962*, table 156.

¹ Stocks shown have been converted to a farm-sales weight basis—the equivalent of weight at the time of sale by growers—thereby making these figures of leaf-tobacco stocks comparable with figures of leaf-tobacco production.

² Stocks on the Island of Puerto Rico are included.

³ Stocks of types 81 and 90 are not converted to a farm-sales-weight but are shown on the unstemmed weight basis. Stemmed stocks reported have been converted to an unstemmed equivalent. A factor for converting to a farm-sales-weight has not been determined.

Agricultural Marketing Service.

¹ This table does not show total support operations for tobacco. Only burley and flue-cured are shown because they are substantially more important in the total tobacco picture than other types which are also supported.

² Exceeds 90 percent of parity for flue-cured in 1953, and 1955, and for burley in 1953 through 1955, because of a decline in parity after the minimum support price was announced in March 1953 and in April 1954 and 1955.

³ Title to tobacco obtained under the price support program is retained in most cases by the Producer's Cooperative Association handling price support loans.

⁴ Parity price no longer used to determine support level.

⁵ Preliminary.

Agricultural Stabilization and Conservation Service.

1960.....	27.3	16.6	4.02	12.1	4.6	6.6	11.2	14.7
1961.....	27.6	16.6	4.22	12.4	4.4	6.6	11.0	15.3
1962 ⁶	27.8	16.6	3.87	12.5	4.7	6.7	11.4	13.9

¹ The consumer price index for regular-size cigarettes, U.S. Department of Labor, is applied to December 1952 price per pack to compute quarterly prices. Annual retail cost per pack is simple average of prices for September, December, March, and June.

² U.S. Department of Labor. Average of list prices of three manufacturers for popular brands of cigarettes delivered to wholesalers and jobbers—adjusted for cash and trade discounts.

³ Value of 0.065 pound of leaf tobacco (farm-sales weight), calculated from seasonal prices received by growers for three kinds of cigarette-type tobacco. Auction fees have not been deducted.

⁴ Spread between wholesale price, excluding Federal excise tax, and farm value.

⁵ Retail-wholesale spread less average State tax.

⁶ Preliminary.

Economic Research Service. Data for 1939-52 in *Agricultural Statistics, 1962*, table 160.

Table 160.—Cigarettes: Total output, domestic consumption, tax-exempt removals, and exports, United States, 1953-62

Year	Total output	Domestic consumption ¹	Tax-exempt removals ²		Year	Total output	Domestic consumption ¹	Tax-exempt removals ²	
			Total	Exports				Total	Exports
	<i>Billions</i>	<i>Billions</i>	<i>Billions</i>	<i>Billions</i>		<i>Billions</i>	<i>Billions</i>	<i>Billions</i>	<i>Billions</i>

CHAPTER III

STATISTICS OF OILSEEDS, FATS, AND OILS

This chapter includes information on cottonseed, flaxseed, olive oil, peanuts, soybeans, tung nuts, margarine, and fats and oils. Most butter statistics are included in the chapter on dairy and poultry statistics. Lard data are mostly in the chapter on livestock.

Table 164.—Cottonseed: Cotton acreage, cottonseed yield, production, farm disposition, season average price per ton received by farmers, and value, United States, 1949-62

Year	Harvested acreage of cotton	Cottonseed					
		Yield of seed per harvested acre	Pro-duction	Total sales to oil mills	Other ¹	Price ²	Farm value

¹ United States averages not fully representative of entire crop because of relatively small volume of seed graded in some areas.² These basic factors are combined to form indexes of quantity and quality which in turn are used to determine the official grade of cottonseed in accordance with the United States Official Standards for Grades.³ The quantity index measures the oil and cake or meal in the cottonseed, taking into account variations in the quantity of oil, protein, and linters.⁴ The quality index measures the deterioration in oil and meal and takes into account the excesses of moisture and foreign matter.⁵ The average grade is the product of the quantity index times the quality index. The base grade is 100.0.⁶ Samples graded by licensed chemists under the supervision of the U.S. Department of Agriculture.Agricultural Marketing Service. Data for 1944-51 in *Agricultural Statistics, 1962*, table 168.

¹ Harvests of the Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus the crop harvested in the Northern Hemisphere countries in 1962 is combined with the Southern Hemisphere harvest which begins late in 1962 and ends early in 1963. Estimates do not include China where annual production probably varies from 1 to 2 million bushels.

² Preliminary.

³ Planted acreage.

⁴ Acreage includes area for fiber.

⁵ Includes that portion of fiber acreage which is harvested for seed as well as fiber.

⁶ Less than 5 years.

⁷ Includes seed from fiber flax.

⁸ Includes estimates for the above countries for which data are not available and for minor producing countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attaches and Foreign Service Officers, results of office research and related information.

¹ Peanuts in the shell. Southern Hemisphere peanut crops, which are harvested from April to June, are combined with those of the Northern Hemisphere harvested from September through December of the same year.

² Preliminary.

³ Includes estimates for the above countries for which data are not available and for minor producing countries.

⁴ Planted acreage.

⁵ Less than 5 years.

⁶ Less than 500 acres and 50 tons.

⁷ Commercial crop.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Years shown refer to years of harvest. Southern Hemisphere crops which are harvested in the early part of the year are combined with those of the Northern Hemisphere harvested the latter part of the same year.

² Preliminary.

³ Acreage harvested for beans.

⁴ Less than 5 years.

⁵ Less than 500 acres.

⁶ Includes Rwanda and Burundi.

⁷ Purchases for export. Local consumption is small.

⁸ Includes estimates for the above countries for which data are not available and for minor producing countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Preliminary.

² Includes edible hydrogenated cottonseed oil.

³ Includes edible hydrogenated soybean oil.

⁴ Byproduct of winterizing cottonseed, soybean, corn, and peanut oils. Included in the primary oils beginning 1959.

⁵ Includes peanut, corn, crude and refined oils not reported separately. Also includes fish oils which have been negligible in recent years.

⁶ Mostly coconut oil.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce. Totals computed from unrounded numbers.

¹ Includes butter (fat content), lard, beef fats, cottonseed, peanut, soybean, corn and olive oils, and minor oils such as sesame. Stocks and exports also include margarine, shortening, vegetable stearine and secondary edible oils.

² Production and exports also include oil equivalent of exported soybeans, cottonseed, and peanuts for crushing abroad.

³ Chiefly coconut, babassu, palm kernel, and palm oils.

⁴ Includes shipments to United States Territories.

⁵ In some years disappearance cannot be computed from data contained in this table, as adjustments have been made because additional items have been incorporated in stock data.

⁶ Preliminary.

Economic Research Service. Compiled from reports of the Commerce and Agriculture Departments. Totals and per capita estimates computed from unrounded numbers. Data for 1934-52 in *Agricultural Statistics, 1962*, table 215.

¹ Years shown refer to the years in which the predominant share of the oils was produced.

² Preliminary.

³ Indigenous—that is, exports from producing countries.

⁴ Estimates of U.S. oil production include actual oil produced plus the oil equivalent of exported oilseeds; estimates for other countries are based on the assumption that varying quantities of the oilseeds produced are crushed for oil.

⁵ 1955-58 average.

⁶ Net exports (exports minus imports).

⁷ Production estimated on the basis of exports and information available on production and consumption in the various producing areas.

⁸ Less than 500 tons.

⁹ Production relates to rendered lard only in most countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Mainly salad and cooking oils. Includes all oils and fats (other than butter, lard, margarine, or shortening) used in mayonnaise and salad dressing, bakery goods, confectionery, commercial roasting and frying, etc.

² Including only the fat content of butter, estimated at 80.5 percent of total weight, and of margarine for which the fat content varies slightly each year.

³ Preliminary.

⁴ Fat equivalent of soap used in synthetic rubber, is included with "Other industrial products."

⁵ Paints, varnishes, floor coverings, oilcloth, printing inks, core oils, synthetic resins, insulation, linings, packings, coated fabrics (other than oilcloth), caulking, and other protective coatings.

Economic Research Service. Computed from reports of the Commerce, Interior, and Agriculture Departments. Totals and per capita estimates computed from unrounded numbers. Data for 1939-52 in *Agricultural Statistics, 1962*, table 221.

¹ Prices as originally quoted have been adjusted to include the 3-cent-per-pound tax on first domestic processing. Public Law 85-235 suspends the 3 cent tax imposed by section 4511 (as beginning October 1, 1957 and ending June 30, 1963).

² Less than 12 months.

³ Less than 5 years.

⁴ Excludes tax in 1950-54, major uses are tax exempt.

⁵ Beginning August 1959 quoted as tanks.

Economic Research Service. Compiled from Oil, Paint, and Drug Reporter; the National Provisioner; The Journal of Commerce (New York); Wall Street Journal (Chicago edition); and the U.S. Department of Labor. Excise taxes and duties are included where applicable.

CHAPTER IV

STATISTICS OF FRUITS, VEGETABLES, MELONS, TREE NUTS, AND BEVERAGE CROPS

These crops are arranged in two major groups within the chapter: (1) Fruits and berries; and (2) vegetables, melons, tree nuts, and beverage crops (tea, cacao beans, and coffee). Also, toward the end of the second group are included summary tables on unloads of both fruits and vegetables.

Fruits and Berries

Estimates of fruit production, in general, relate to the harvested crop although in some years quantities not harvested because of low prices or other economic factors are included. Losses from natural causes, such as windstorms, freezes, etc., are not included in production. Production relates to the total crop produced on all farms, except for apples and strawberries. In accordance with Congressional enactment, the Department's estimates of apple production since 1938 have related only to the crop in commercial areas. The estimates for strawberries cover production on acreage grown primarily for sale.

The annual estimates are checked and adjusted at the end of each marketing season on the basis of shipment and processing records from transportation agencies, processors, cooperative marketing associations, and other industry organizations. The estimates are reviewed (and revised if necessary) at 5-year intervals, when census data become available. The Department's available statistics are limited to the major tree fruits and nuts and to grapes, cranberries, and strawberries, and exclude some States where census data indicate production is of only minor importance.

¹ Estimates of the commercial crop refer to the total production of apples in the commercial apple areas of each State.

² Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.

³ Equivalent packinghouse-door returns for Oregon and Washington, equivalent returns for bulk fruit at the first delivery point for California, and average price as sold for other States. U.S. prices obtained by weighting State prices by quantity sold.

⁴ Dried and canned are converted to terms of fresh apples on following basis: 1 pound dried is equivalent to 8 pounds fresh; 1 pound canned is equivalent to about 2 pounds fresh; 48 pounds fresh equal 1 bushel. No re-exports reported.

⁵ Domestic exports minus imports for consumption with net imports shown by a minus sign.

⁶ Census returns of total harvested production of all areas in the United States.

⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns of harvested production. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1934-48, with production and value on total crop basis, in *Agricultural Statistics, 1962*, table 228.

¹ Production, price, and value for California, Washington, and Utah. The 1954 census reported these 3 States as having 97.8 percent of the 1954 production. ² Differences between "Total production" and "Production having value" consists of fruit not harvested on account of economic conditions. ³ Obtained by weighting State prices by quantity sold. ⁴ Net processed weight. ⁵ Dried apricots are 12½ percent of total dried fruit for salad. ⁶ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis of 5.5 tons fresh to 1 ton dried. Canned converted to fresh at ratio of 60 cases to 1 ton. ⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Exports from reports of the U.S. Department of Commerce. Data for 1924-48 in *Agricultural Statistics, 1962*, table 236.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1962, sour cherries (tons): New York, 1,100; Pennsylvania, 400; Ohio, 50; Michigan, 4,000; Wisconsin, 900.

² Preliminary.

³ Includes excess cullage of harvested fruit (tons): 1961—900; 1962—2,000.

⁴ Equivalent returns per ton for bulk fruit at the packinghouse-door.

⁵ Equivalent returns per ton for bulk fruit at the first delivery point.

⁶ Includes some States for which estimates have been discontinued.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 246

¹ Season begins with the bloom of the year shown and ends with the completion of harvest the following year. In California picking usually extends from about Oct. 1 to Dec. 31 of the following year. (15 months). In other States the season begins about Oct. 1 and ends in early summer, except for Florida limes, harvest of which usually starts about Apr. 1.

² Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For weight of boxes see pages V and VI.

³ Differences between "Total production" and "Production having value" consist of fruit unharvested, donated to charity, or not utilized on account of economic conditions.

⁴ Equivalent returns per box at the intake packinghouse-door for all methods of sale. When sale represents fruit sold at point other than intake packinghouse-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold. Obtained by weighting State prices by quantity sold.

⁵ Includes quantities used for juice, concentrates, grapefruit segments, and other citrus products. In some seasons, includes appreciable quantities of oranges and lemons in California delivered to processing plants which were not utilized, but for which growers received payment.

⁶ Year beginning November for oranges and lemons; year beginning September for grapefruit; year beginning July for limes. Tangerines included with oranges.

⁷ Exports reported in pounds. Converted to boxes on the following basis: Oranges, 84 pounds per box; grapefruit, 78 pounds per box; lemons, 79 pounds per box.

⁸ Imports converted to boxes on the following basis: Oranges, 90 pounds per box; grapefruit, 80 pounds per box; lemons, 76 pounds per box; limes, 80 pounds per box.

⁹ Estimates for oranges include small quantities of tangerines in California, Arizona, and Texas. Estimates for tangerines are for Florida only.

¹⁰ Production estimated as of May 1, 1963.

¹¹ Less than 500 boxes.

¹² Estimates not made prior to the 1955-56 crop.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929-48 in *Agricultural Statistics, 1962*, table 248.

¹ Differences between "Production" and "Production having value" are economic abandonment.

² For sour varieties includes some quantities used for juice, jam, jelly, brining, etc.

³ For sweet varieties includes some quantities used for juice, wine, brandy, canning, freezing, etc.

⁴ New York, Pennsylvania, and Michigan.

⁵ Montana, Idaho, Colorado, and Utah.

⁶ Some quantities brined are included with canned to avoid disclosure of individual operations.

⁷ Montana, Idaho, Colorado, Utah, Washington, and Oregon.

¹ Season begins with the bloom of the year shown and ends with completion of harvest the following year. For oranges, harvest in California usually starts in early November of the year shown and continues into November of the following year. In other States, harvest of oranges begins about October 1 and ends in early summer. Grapefruit harvest, for the California Desert Valleys and for all other States, begins in the fall and ends by early summer. Harvest of other California grapefruit extends from early summer, of the year after bloom, through September. California lemons are harvested from November through the following calendar year. Florida limes are picked mostly from April through December. Florida tangelos are harvested largely from October through April. Fruit ripened on the trees but destroyed by freezing or storms prior to picking is not included. For some States in certain years production includes quantities unharvested or harvested and not utilized on account of economic conditions, and quantities donated to charity. In 1961, estimates of such quantities were as follows (1,000 boxes): California—Navel and miscellaneous oranges, 140; Valencias, 130; grapefruit—Florida, seedless, 100; other, 100; Arizona, 100; California, Desert Valleys, 120.

² As estimated from prospects on May 1, 1963.

³ Equivalent returns per box at the intake packinghouse-door for all methods of sale. When sale represents fruit sold at point of other than packinghouse-door, prices of fruit as sold are converted by additions or subtractions of necessary charges to or from prices of fruit as actually sold.

⁴ Navel and miscellaneous varieties in California and Arizona. Early and midseason varieties in Florida and Texas. All varieties in Louisiana. For all States, except Florida, includes small quantities of tangerines.

⁵ Net content of box varies. Approximate averages are as follows: Oranges, California and Arizona, 75 pounds, Florida and other States, 90 pounds; tangerines, 90 pounds; grapefruit, California, Desert Valleys, and Arizona 64 pounds, other California areas, 67 pounds, Florida and Texas, 80 pounds; lemons, 76 pounds; limes, 80 pounds; tangelos, 90 pounds.

⁶ Less than 10 years.

¹ Harvesting in Northern Hemisphere countries begins in November of the year shown, and in Southern Hemisphere countries begins in May following the year shown. Production in foreign countries converted to boxes of the following weights: Oranges 70 pounds; grapefruit and limes 80 pounds; lemons 76 pounds.

² Preliminary.

³ Includes unharvested production and fruit not of export variety or grade.

⁴ Production from the bloom of indicated years is harvested the two following years, i.e., crop from the bloom of 1961 is harvested in 1962-63.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Estimates relate to Massachusetts, New Jersey, Wisconsin, Washington, and Oregon.² Includes the following quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit (barrels): 1949-26,000; 1950-62,100; 1956-18,000; 1960-4,000; 1961-1,000. In 1959 includes 18,900 barrels unharvested, confiscated, and dumped which did not qualify for payment under the Cranberry Payment Program, AMM, 181a.³ Obtained by weighting State prices by quantity sold. Equivalent returns for fruit at the first receiving station. For 1959, includes returns to growers for cranberries dumped which qualified for payment under the Cranberry Payment Program, AMM, 181a.⁴ Mainly for canning.⁵ Barrels of 100 pounds.⁶ Preliminary.Statistical Reporting Service. Data for 1929-48 in *Agricultural Statistics, 1962*, table 258.**Table 257.—Cranberries: Acreage, yield, production, and season average price per barrel received by farmers, by States, average 1951-60, annual 1961 and 1962**

¹ Includes the following quantities unharvested on account of economic conditions and/or excess cullage of harvested fruit (1,000 tons): California, 1956-12. Other States, 1950-3; 1951-2; 1957-6; 1962-200.

² Equivalent returns per ton for bulk fruit at the first delivery point.

³ Obtained by weighting State prices by quantity sold.

⁴ Preliminary.

⁵ Converted on the basis of country data, using the following weight per cubic foot: Argentina and Chile, 36 pounds; Belgium and Netherlands, 10 pounds; Canada, Italy, and Mexico, 40 pounds; Spain, 24 pounds; Union of South Africa, 16 pounds; and all other, 20 pounds.

⁶ Domestic exports minus imports for consumption.

⁷ Included in total production of grapes, fresh basis; 1 ton of raisins equivalent to about 4 tons of fresh grapes.

⁸ Exports and imports of raisins converted to sweatbox, or production basis at the ratio of 1 to 1.08.

⁹ Includes currants.

Statistical Reporting Service and Economic Research Service. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1929-48 in *Agricultural Statistics, 1962*, table 262.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1962 estimates of such quantities were as follows (tons): South Carolina, 140.

² Preliminary.

³ Includes 60 tons excess cullage of harvested fruit.

⁴ Equivalent returns per ton for bulk fruit at the first delivery point.

⁵ Dried basis: 1 ton of raisins equivalent to about 4 tons of fresh grapes.

Statistical Reporting Service.

¹ Boston, Chicago, Cincinnati, Cleveland, Detroit, Jersey City, New York, Philadelphia, Pittsburgh, and St. Louis. From start of season in late May through the entire marketing season ending the following May. The Cincinnati auction was discontinued as of May 31, 1960.

² Table stock mostly in packages containing about 28 pounds, some in packages containing 16-26 pounds; juice stock mostly in packages containing 36-42 pounds.

³ Prices are weighted by number of packages sold.

⁴ Table grapes are those packed for sale for table use.

⁵ Juice grapes are those packed for sale for juice purposes.

⁶ Includes varieties not listed in this table.

¹ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.² Obtained by weighting State prices by quantity sold.³ Net processed weight.⁴ Canned peaches are 40 percent of total canned fruit for salad.⁵ Dried peaches are 21 percent of total dried fruit for salad.⁶ Exports of dried fruit converted to unprocessed dry weight by dividing by 1.07. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1 pound dried equals 6.5 pounds fresh. Canned peaches converted to terms of fresh on basis that 1 pound canned equals about 1 pound fresh. 48 pounds of fresh equal 1 bushel.⁷ Preliminary.Statistical Reporting Service and Economic Research Service. Italic figures are census returns of harvested production. Foreign trade data from reports of the U. S. Department of Commerce. Data for 1924-48 in *Agricultural Statistics, 1962*, table 270.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1961 and 1962 estimates of such quantities were as follows (1,000 bushels): 1961—Michigan, 100; North Carolina, 100; South Carolina, 225; Georgia, 205; 1962—South Carolina, 100; Georgia, 195; Utah, 15; Washington, 200.

² Preliminary.

³ Includes excess cullage of harvested fruit (1,000 bushels): 1961—South Carolina, 350; Georgia, 145; Colorado, 238; Washington, 100; California, Clingstone, 2,938; 1962—Maryland, 20; South Carolina, 150; Georgia, 205; Colorado, 434; Washington, 220; California, Clingstone, 3,350.

⁴ Less than 10 years. No prices in 1955, as there was little or no production.

⁵ Mainly for canning.

Statistical Reporting Service.

¹ Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage or harvested fruit.

² Obtained by weighting State prices by quantity sold.

³ Not processed weight.

⁴ Dried pears are 16 2/3 percent of total dried fruit for salad.

⁵ Canned pears are 35 percent of total canned fruit for salad.

⁶ Canned pears converted to terms of fresh on the basis that 1 pound canned equals about 1.2 pounds fresh; dried pears converted to terms of fresh on the basis that 1 pound dried equals about 5.5 pounds fresh; 50 pounds fresh equals 1 bushel, except in California, where 48 pounds equal 1 bushel.

⁷ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns of harvested production. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924-48 in *Agricultural Statistics, 1962*, table 276.

¹ For some States in certain years, production includes some quantities unharvested on account of economic conditions. In 1962, estimates of such quantities were as follows (tons): Prunes, Washington, 300.

² Preliminary.

³ Includes excess cullage of harvested fruit (tons): 1961—Plums, California, 2,000; Prunes, Washington, 1,000; 1962—Plums, California, 2,000; Prunes, Washington, 1,500.

⁴ In California, the drying ratio is approximately 2 1/2 pounds of fresh fruit to 1 pound dried.

¹ Production, price, and value for Idaho, Washington, Oregon, and California.
² Differences between "Total production" and "Production having value" consist of fruit not harvested on account of economic conditions and/or excess cullage of harvested fruit.
³ Obtained by weighting State prices by quantity sold.
⁴ Net processed weight.
⁵ Dried prunes in salad estimated at 43 percent of total dried fruit for salad.
⁶ Exports and imports of dried prunes converted to unprocessed dry weight by dividing by 1.025. Unprocessed dry weight converted to terms of fresh fruit on the basis that 1

pound dried equals 2 1/2 pounds fresh. Canned prunes converted to terms of fresh fruit on the basis that 1 pound canned equals 0.729 pound fresh. Otherwise prepared or preserved, converted to terms of fresh fruit on the basis that 1 pound equals 0.899 pound fresh.
⁷ Preliminary.

¹ Data for all commodities are on a calendar-year basis, except apples and pears which begin in June of year indicated and end the following year. Shipments by truck are not included but represent a large proportion of total movement, especially for some commodities. The data are not indicative of total production or total sales.

² Includes Satsumas and tangerines.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1939-52 in *Agricultural Statistics, 1962*, table 294.

¹ Includes the commercial pack only and does not include quantities of fruit frozen by industrial users or other types of processors who use all or the largest portion of their frozen pack as raw material for the manufacture of jams, jellies, and other fruit spreads, ice cream, bakery goods, or alcoholic beverages. Also does not include custom freezing for industrial users nor quantities produced in frozen food locker plants.

² Connecticut, Maine, Massachusetts, New Jersey, New York, Pennsylvania, and Rhode Island.

³ Alabama, Arkansas, Delaware, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, Missouri, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia.

⁴ Illinois, Indiana, Michigan, Minnesota, Nebraska, Ohio, and Wisconsin.

⁵ Arizona, California, Colorado, Idaho, Montana, Oregon, Utah, and Washington.

⁶ Includes some packs in South.

⁷ Data by regions not available for publication.

⁸ Includes small packs in South and West.

⁹ Includes some packs in the Midwest.

¹⁰ Includes small production in Northeast and Midwest.

¹¹ Includes small packs in Northeast and South.

¹² Includes bananas, Bing cherries, citrus salad, cranberries, cranberry relish, figs, grapefruit, melon balls, melons, miscellaneous varieties of blackberries, mixed fruit, nectarines, ollalieberries, oranges, pineapple, plums, purple raspberries, and miscellaneous fruit and berry purees. Hawaiian production of pineapple is included with the West.

¹³ See table 251 for packs of concentrated grapefruit and orange juice in gallons, pack-year basis.

¹⁴ Orange concentrate only. Data on other citrus concentrate for California-Arizona not available.

Economic Research Service. Data from National Association of Frozen Food Packers and Florida Cannery Association.

¹ Fresh citrus fruits are on a crop year basis. Dried fruits are on a pack year. The per capita civilian consumption was obtained by dividing the total apparent civilian consumption by total population adjusted for members of the armed forces not eating out of civilian supplies.

² Excludes noncommercial apples.

³ Apricots, avocados, bananas, cranberries, figs, grapes, nectarines, peaches, pears, pineapples; and (including an estimate for noncommercial) cherries, plums and prunes, and strawberries.

⁴ Apples, applesauce, apricots, berries, cherries (including brined), cranberries, figs, fruit cocktail and salad, citrus segments, olives (including brined), pineapple, plums, prunes, peaches (including spiced), and pears.

⁵ Grapefruit, orange, blended citrus, lemon and lime, tangerine and blend, pineapple, apple, grape and prune juices, and fruit nectars. Includes canned concentrated citrus juices converted to a single-strength basis, but excludes all frozen juices.

⁶ Dried apples, apricots, dates, figs, peaches, pears, prunes, and raisins, except for unmerchantable figs, standard prunes, and prunes used for juice and concentrate. Data are in terms of processed dried weight.

⁷ Principally cherries, apples, peaches, apricots, strawberries, other berries, and citrus juices.

⁸ Includes chilled citrus juices beginning 1955.

⁹ Includes chilled sections and salads beginning 1956.

Economic Research Service. Data for 1900-48 in *Agricultural Statistics, 1962*, table 303.

Vegetables and Melons

This section contains statistics on potatoes, sweetpotatoes, and commercial vegetables and melons.

For potatoes and sweetpotatoes the estimates of acreage, production, value, and farm disposition pertain to the total crop and include quantities produced both for sale and for use as food, feed, and seed on farms where grown. Potato statistics are shown on a within-year seasonal grouping of winter, early spring, late spring, early summer, late summer, and fall crops, by States. Some States have production in more than one seasonal group.

For processing vegetables, the estimates of acreage, production, and value for each of the 10 crops relate to production used by commercial canners, freezers, and other processors except dehydrators. These estimates include raw products grown by processors themselves and those grown under contract or purchased on the open market. This production and the actual or equivalent acreage harvested are not duplicated in the fresh market estimates for the same commodities. The production of those vegetables used for processing for which regular processing estimates are not made, is included in the fresh market estimates.

The Department's regular monthly and annual program of estimates of commercial vegetables for fresh market includes 27 principal vegetable and melon crops in the major producing States. These estimates relate to crops which are grown primarily for sale and they do not include vegetables and melons produced in farm and nonfarm gardens. Although the bulk of the production of the 27 principal vegetable and melons crops is for consumption in the fresh state, data for some commodities include quantities used by processors. Such crops as artichokes, broccoli, brussels sprouts, carrots, cauliflower, celery, garlic, kale, onions, and green peppers for which separate estimates for commercial processing are not prepared, are in this category. The commercial estimates of the principal crops for the years 1939 to date include local market production from areas near consuming centers as well as production from well-recognized commercial areas which specialize in producing supplies for shipment to distant markets. Estimates of commercial vegetables for fresh market prepared for years prior to 1939 are not strictly comparable with the series for 1939 and later years as the earlier series pertain largely to important commercial shipping areas and for the most part do not include local market production from areas near consuming centers.

Annual estimates of national commercial production of all vegetables are presented in table 302. For fresh market vegetables they include production for sale of (1) the 27 principal crops (27 since 1953) in the major producing States for which regular seasonal estimates are prepared, (2) the principal 27 crops in unimportant producing States, (3) greenhouse vegetables in all States, and (4) minor vegetables in all States. These figures show that the regular program of releases of commercial fresh market vegetable estimates for principal crops in major producing States account for over four-fifths of the national commercial output of all fresh vegetables and melons. The total national commercial production of each of the principal vegetable and melon crops and aggregate production of minor vegetables is published by the Statistical Reporting Service, but production estimates by States, and comparable data on acreage and value, are not available.

The seasonal nature of the production of vegetables and melons for fresh market and their perishability created a need for information on supplies available during specific periods of the year to facilitate orderly marketing. Vegetable and melon estimates are classified according to the season or period within the season when the bulk of each crop is usually harvested. The forecasts and estimates of acreage and production therefore provide a measure of supplies available in specific seasonal periods. The seasonal groupings used are as follows:

Seasonal Classifications Used for Vegetable and Melon Crops

Dates refer to period of most active harvest

Classifications Most Commonly Used

Winter: January, February, March.
Spring: April, May, June.
Early Spring: April 1–May 15.
Late Spring: May 16–June 30.
Summer: July, August, September.

Early Summer: July 1–August 15.
Late Summer: August 16–September 30.
Fall: October, November, December.
Early Fall: October 1–November 15.
Late Fall: November 16–December 31.

Classifications Used for Certain Short Season Crops

Early Spring: April.
Mid-Spring: May.
Late Spring: June.

Early Summer: July.
Mid-Summer: August.
Late Summer: September.

In practice the beginning and ending of these seasons are not fixed dates but approximations. There is necessarily some overlapping in the marketing seasons for individual crops, and weather frequently disturbs normal harvesting schedules. Consequently, the classifications employed are less precise than the dates indicate.

¹ Commercial production, including greenhouse production, of all fresh market vegetables and melons in all States. Includes the production shown in table 303 for the 28 principal vegetables, (27 since 1953). Does not include production for home consumption in farm and nonfarm gardens. Production by States, and acreage and value data not available.

² Production in all States of the 10 principal vegetables for processing shown in table 303 plus pimiento peppers. Production of other vegetables processed included in fresh market series of estimates.

³ Beginning 1954, includes Hawaii.

⁴ Beginning 1960, includes Alaska.

⁵ Preliminary.

Statistical Reporting Service. Data for 1919–48 in *Agricultural Statistics, 1962*, table 304.

¹ Acreage for fresh market is acreage for harvest, including any partially harvested or not harvested because of low prices or other economic factors. Acreage for processing is acreage harvested.

² Acreage, production, and farm value of the following 28 crops (27 since 1953), for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons prior to 1954, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons.

³ Acreage, production, and farm value of the following 10 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, pimientos prior to 1954, spinach, and tomatoes. Production of other vegetables processed included in fresh market series of estimates.

⁴ Production for fresh market includes some quantities not marketed because of low prices or other economic factors which are excluded in computing value.

⁵ Beginning 1960, includes Alaska and Hawaii.

⁶ Preliminary.

Statistical Reporting Service. Data for 1939-48 in *Agricultural Statistics, 1962*, table 305.

¹ Production for fresh market includes some quantities not marketed and excluded in computing value.

² Production of the following 27 crops for which regular seasonal estimates are prepared in major producing States: Artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons.

³ Preliminary.

⁴ Production of the following 10 crops in all States: Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers (pickles), green peas, spinach, and tomatoes. Other vegetables processed included in fresh market series of estimates.

¹ Fresh market and processing asparagus is frequently harvested from the same acreage. Therefore, it is not practical to make individual acreage estimates for these segments.

² Preliminary.

³ Mostly for processing. Includes New York, Indiana, Wisconsin, Minnesota, Iowa, Missouri, Nebraska, Virginia, Arkansas, Idaho, and Tennessee.

⁴ Fresh market includes Pennsylvania, Ohio, and Iowa. Processing includes New York, Pennsylvania, Ohio, Indiana, Wisconsin, Minnesota, Missouri, Nebraska, Virginia, Arkansas, Idaho, Iowa, and Tennessee.

¹ The following quantities were unharvested and/or not marketed and have been excluded in computing price and value (1,000 hundredweight): 1950-741; 1951-656; 1953-3,068; 1955-1,147; 1957-534; 1958-934; 1959-248; 1961-48.

² Obtained by weighting State prices by quantity sold.

³ Prices are of eastern potatoes weighted by unloads, seasons September-May. Beginning 1951, price data are for Maine and Long Island potatoes only.

⁴ Domestic exports minus imports for consumption, with net imports shown by a minus sign.

⁵ Includes shipments under the Army Civilian Supply Program.

⁶ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924-48 in *Agricultural Statistics, 1962*, table 352.

¹ Estimated percentage of completeness for reported truck unloads for 1962: Atlanta, Los Angeles and New York, 90%; Boston, 85-90%; Philadelphia, 90-95%; San Francisco, 95%; Baltimore and Chicago, 85%.

² Includes Newark beginning with 1958.

³ Includes Oakland beginning with 1958.

⁴ Includes satsumas.

⁵ Includes straight and mixed cars of honeydews, persians and other melons except watermelons.

⁶ Includes romaine.

Agricultural Marketing Service. Annual totals for 1939-51 are published in *Agricultural Statistics, 1962*.

¹ Shipments by truck are not included but have become increasingly important during this period. The data are not indicative of total production or total sales.

² Includes casaba, honeydew, persian, and mixed melons. Cars of mixed melons may include cantaloups as well as other muskmelons.

Agricultural Marketing Service. Compiled from daily and monthly reports received from officials and local agents of common carriers, throughout the country. Shipments shown in carlots include boat shipments reduced to a carlot basis. Data for 1939-52 in *Agricultural Statistics, 1962*, table 373.

¹ Total crop for processing converted to a canned basis by applying factors (cases of 24 No. 303 cans per ton farm weight): Cucumbers for pickles, 83 cases; cabbage for kraut, 65.9 cases; pimientos (1953-55) 35.4 cases, and since 1955, National Canners Association pack data.

² Equivalent cases of 24 No. 303 cans.

³ Preliminary.

⁴ Includes combination vegetable juices containing at least 70 percent tomato juice.

Economic Research Service. Compiled mainly from reports of the National Canners Association. In addition to the vegetables shown in this table, considerable quantities of the following products also are canned: Baked beans, carrots and peas, corn on the cob, hominy, kidney beans, mixed vegetables, mushrooms, okra, other greens than spinach, potatoes, rhubarb, sauerkraut juice, soups, spaghetti, succotash, sweetpotatoes, and vegetable puree. Data for 1939-52 in *Agricultural Statistics, 1962*, table 377.

FOOTNOTES FOR TABLE 373

¹ Fresh vegetable consumption computed from estimated total commercial production for fresh market including estimated greenhouse production. Does not include production for home use. Civilian consumption—obtained by dividing the total apparent civilian consumption by total civilian population as reported by the Census. All data for calendar year except dry field peas on crop year basis.

² Preliminary.

³ Close trim basis since 1954; slight trim basis in prior years.

⁴ Includes 0.1 pound of shallots through 1958; since 1958 less than 0.05 pound.

⁵ Includes farm weight equivalent of potatoes used in mixtures, flour, dehydration, chips and shoestring potatoes; these uses for the past 3 years amounted to 16 to 18 percent of the totals shown; excludes canned and frozen.

Economic Research Service. Data for 1910-48 in *Agricultural Statistics, 1962*, table 375.

¹ Excludes soups and baby food.

² Minor vegetables are included in "other".

³ Preliminary.

⁴ Based on information available for 1944-46, tomato juice comprises approximately 85 percent of the total, combination vegetable juices 13 percent, and other vegetable juices 2 percent. Combination vegetable juice contains approximately 70 percent or more tomato juice.

⁵ Computed as a residual; includes miscellaneous greens, pimientos, potatoes, mixed vegetables, and all items for which no separate data are available.

Economic Research Service. Data for 1909-48 in *Agricultural Statistics, 1962*, table 376.

¹ Data for asparagus, lima beans, sweet corn and sauerkraut are either estimates or interpolations.

² Actual cases.

³ Canner's stocks of sauerkraut converted to cases by using a factor of 14 cases of 24 1/2's per barrel (of 45 gallons).

Agricultural Marketing Service. Compiled mainly from reports of the National Canners' Association, the Canners' League of California, the National Kraut Packers Association and the U.S. Department of Commerce.

¹ Includes almonds, filberts, pecans, walnuts, Brazil nuts, pignolia, pistache, chestnuts, cashews, and miscellaneous tree nuts.

² Almonds, filberts, walnuts, and pecans only; no reports on other nuts. Excludes quantities unharvested and culls not used or used for oil.

³ Foreign trade data on a fiscal-year basis, beginning July 1 of year indicated.

⁴ Preliminary.

Economic Research Service. Data for 1939-48 in *Agricultural Statistics, 1962*, table 384.

CHAPTER V

STATISTICS OF HAY, SEEDS, AND MINOR FIELD CROPS

Chapter V deals with hay, pasture, seeds, and various minor field crops. The reader will note a break in the continuity of some of the hay series; this results from a change in the method of estimating prairie or wild hay, which is explained in the footnotes of the appropriate tables. Table 417 shows the seeding rate for a number of specified crops. The State averages represent the latest information available and are based largely on surveys made annually or every few years. The United States average rates are derived by weighting the average for each State by the acreage planted to the particular crop. Rates are not shown for States where the crop is not estimated currently.

Table 395.—Hay, all: Acreage, yield, production, value, and foreign trade, United States, 1949-62

¹ Preliminary.

² Excludes sweetclover and lespedeza hay.

³ Includes prairie, marsh, and salt grass hays.

⁴ Small quantities are produced in other States where they are not estimated separately.

Statistical Reporting Service.

¹ Table includes, besides the ordinary edible beans and beans grown for seed, blackeyes, and garbanzos in California. Soybeans and mung beans are not included.

² Clean basis.

³ Obtained by weighting State prices by quantity sold. Includes allowance for unredeemed loan and purchase agreement deliveries at the average rate.

⁴ Compiled from the New York Journal of Commerce.

⁵ Stocks for 1950 from official reports adjusted for U.S. Department of Agriculture holdings. Estimates for other years based on the best sources available.

⁶ Bags of 100 pounds.

⁷ Census yield and production largely uncleaned basis.

⁸ Preliminary.

Statistical Reporting Service and Economic Research Service. Italic figures are census returns; census figures include all States; other figures, principal producing States only. Foreign trade data from reports of the U.S. Department of Commerce. Data for 1924-48 in *Agricultural Statistics, 1962*, table 420.

¹ Includes the following quantities not marketed because of economic conditions and/or the marketing agreement (1,000 pounds): 1959, 1,384; 1960, 324. Salable allotments under the Marketing Agreement totaled (million pounds): 1949–39; 1950–50; 1951–46.6; 1952–40.4. Price and value apply only to the part of the crop which was sold.

² Prices obtained by weighting State prices by quantity sold.

³ Includes hops held by growers, dealers, and brewers. Stocks for 1950–52 do not include hops held by growers which are not available for sale under the Marketing Agreement.

⁴ Domestic exports minus imports for consumption.

⁵ Records of the Bureau of Internal Revenue.

CHAPTER VI

STATISTICS OF CATTLE, HOGS, SHEEP, HORSES, AND MULES

This chapter contains information about most kinds of farm livestock and livestock products, with the exception of dairy and poultry. The information relates to inventories, production, disposition, prices, and income for farm animals, and to livestock slaughter, meat production, and market statistics for meat animals.

The term "on farms" as used in this chapter includes ranches. Estimated numbers do not include livestock not on farms.

Differences between census inventories and January 1 estimated numbers are large in years when the census relates to a date other than January 1. The census enumerations in 1940 and 1950 were taken as of April 1, the enumerations in 1945 as of January 1, and in 1954 and 1959 as of October and November. Marketings and slaughter of livestock as well as young stock born during the period between January 1 and the date of enumeration can result in some rather large differences in numbers on farms. For example, hog marketings and slaughter are seasonally big during the first few months of the year and during the last 2 or 3 months of the year. As a result, the number on farms January 1 is substantially different than for either the preceding October or the following April.

The table showing numbers of horses and mules on farms, by years, has been dropped, as the estimates have been discontinued.

¹ Beginning 1961, includes Alaska and Hawaii.

² Calves born during the year.

³ Excludes interfarm sales.

⁴ Includes cattle shipped in from other States and from central markets, but excludes intrastate shipments.

⁵ Preliminary.

⁶ Adjustments were made for cattle shipped in and changes in inventory.

⁷ No adjustments made for cost of cattle shipped in and changes in inventory values. Gross income is "Cash receipts from sales of cattle, calves, beef, and veal" plus "Value of cattle and calves slaughtered for home consumption."

Statistical Reporting Service. Data for 1935-52 in *Agricultural Statistics, 1962*, table 463.

¹ Data in this report are obtained from offices of State Veterinarians and include only shipments reported monthly to these offices. Since there are other shipments into some of these States, these data do not represent total shipments. Totals are based on unrounded numbers.

² Includes stockers and feeders which were bought at stockyards.

³ Includes stockers and feeders from points other than public stockyards, some of which are inspected at public stockyards while stopping for feed, water, and rest en route.

⁴ Excludes Wisconsin.

Statistical Reporting Service.

¹ Number of bushels of corn required to buy 100 pounds of live hogs at local markets, based on average prices received by farmers for hogs and corn. Annual average is a simple average of monthly ratios.

² Simple average of mid-month prices.

Statistical Reporting Service. Data for 1920-52 in *Agricultural Statistics, 1962*, table 490.

FOOTNOTES FOR TABLE 486

¹ Weighted averages; obtained from monthly survey of slaughtering plants.

Agricultural Marketing Service. In recent years the packer-style carcass weight of hogs averaged 69 percent of the live weight, and pork, excluding lard, averaged 58 percent of the live weight. Data for 1940-51 in *Agricultural Statistics, 1962*, table 488.

¹ Includes St. Louis National Stockyards, Illinois, and St. Louis, Mo.² Totals are based on unrounded numbers.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 500

¹ Excludes interfarm sales.² Includes sheep and lambs shipped in from other States and from central markets but excludes intrastate shipments.³ Adjustments made for cost of sheep and lambs shipped in and changes in inventory.⁴ No adjustments made for cost of sheep and lambs shipped in and changes in inventory values. Gross income is "Cash receipts from sales of sheep, lambs, mutton, and lamb" plus "Value of sheep and lambs slaughtered for home consumption."

Statistical Reporting Service.

¹ Includes slaughter under Federal inspection and other commercial slaughter; excludes farm slaughter. Average live weight is based on unrounded numbers.² Includes Maine, New Hampshire, Vermont, Massachusetts, Rhode Island and Connecticut.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 503

¹ Data in this report are obtained from offices of State Veterinarians and include only inshipments reported monthly to these offices. Since there are other shipments into some of these States, these data do not represent total inshipments. Totals are based on unrounded numbers.² Includes stockers and feeders which were bought at stockyards.³ Includes stockers and feeders from points other than public stockyards, some of which are inspected at public stockyards while stopping for feed, water, and rest en route.⁴ Excludes Wisconsin.

Statistical Reporting Service.

¹ Includes Alaska and Hawaii for apparel and carpet wool.

² Includes sheep shorn at commercial feeding yards.

³ Average price is for the marketing season April-March.

⁴ Production by States multiplied by season average price.

⁵ Preliminary.

⁶ Weighted average price for wool sold April 1962 through January 1963.

⁷ Actual weight through 1951.

⁸ Apparel wool includes all dutiable wool, carpet wool includes all duty-free wool.

⁹ Production minus exports plus imports; stocks not taken into consideration.

Statistical Reporting Service and Economic Research Service. Imports and exports from reports of the U.S. Department of Commerce. Data for 1930-49 in *Agricultural Statistics, 1962*, table 515.

Table 513.—Wool: Number of sheep shorn, weight per fleece, 1956-60 average price per pound received by farmers, and value of sales, by States, average 1956-60, annual 1961 and 1962

¹ Includes sheep shorn at commercial feeding yards.

² Preliminary.

³ For Texas and California the weight per fleece is the amount of wool shorn per sheep and lamb during the year.

⁴ Price per pound relates to the marketing season April-March, except 1962 which is the weighted average price for wool sold April 1962 through January 1963.

⁵ Production multiplied by season average price.

Statistical Reporting Service.

¹ For summary purposes wool produced mostly in the Northern Hemisphere is combined with that produced in the season beginning July 1 or October 1 of the same year in the Southern Hemisphere. Pulled wool is included for most countries at its greasy equivalent.

² Preliminary.

³ Includes "pulled wool" converted to greasy basis at 1.7.

⁴ Includes allowance for other producing countries not shown.

⁵ Includes Basutoland and South West Africa.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Scoured wool, plus greasy wool converted to a scoured basis, using assumed average yields. Includes both pulled and shorn, foreign and domestic wool. Wool was considered as consumed (1) on the woolen system when laid in mixes (2) on the worsted system when entering scouring bowls. Consumption on the worsted system is taken as the sum of top and noil production.

² 53 weeks.

³ Preliminary.

⁴ Domestic and duty-paid foreign.

⁵ Excludes wool consumed on the cotton system and in the manufacture of felt, hat bodies, and other miscellaneous products.

⁶ Duty-free foreign.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

¹ Wools grown in the range areas of Washington, Oregon, the intermountain States (including Arizona and New Mexico) and parts of the Dakotas, Nebraska, Kansas, and Oklahoma. These wools vary considerably in shrinkage and color.

² Open market prices.

³ Wools grown east of the Mississippi River and in the farm areas of the Dakotas, Nebraska, Kansas, Oklahoma, Minnesota, Iowa, and Missouri.

Economic Research Service. Data for 1940-49 in *Agricultural Statistics, 1962*, table 518.

¹ Preliminary.

² Washed, scoured or clean basis.

³ Includes allowances for any missing data for countries shown and for other producing countries not shown.

⁴ Includes tops.

⁵ Includes exports from South-West Africa and Basutoland.

⁶ Fiscal year beginning in year shown.

⁷ Excludes wool on the skin and re-exports where possible; imports in most cases refer to gross imports.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ For calendar years, carcass weight basis: Beef and veal, pork, mutton, lamb, and goat meat; horsemeat is included in the total meat figure for Japan, Philippines, and Western and Eastern Europe. Excludes variety, rabbit, and poultry meat.

² Excludes fat rendered for lard.

³ Preliminary.

⁴ Includes variety meats.

⁵ Year ending June 30.

⁶ Less than 5 years.

⁷ Includes estimates for non-reporting countries.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Carcass weight equivalent of all meat, including the meat content of minor meats and of mixed products. Exports exclude shipments for military-civilian feeding in United States occupied areas. Shipments to territories include shipments to Puerto Rico, Virgin Islands, and Guam.

² Includes boneless beef as estimated 1953 and reported beginning 1954, also salted beef reported as canned prepared or preserved meat, n.e.s., 1954 to date.

³ Includes beef procured by USDA and shipped abroad by CARE.

⁴ Less than 500,000 pounds.

⁵ Preliminary.

Economic Research Service. Data on imports and commercial exports and shipments are computed from records of the U.S. Department of Commerce; those on exports and shipments by the U.S. Department of Agriculture are separately estimated from deliveries and stocks. Data for 1940-52 in *Agricultural Statistics, 1962*, table 634.

¹ A feed unit is the equivalent of a pound of corn in feeding value.

² Feed consumed by all grain-fattened cattle divided by the number on feed January 1. The total number fattened in the year has been increasing relative to the number on feed January 1 and is now about 85 percent larger than the number on feed January 1.

³ Feed for all cattle, except milk cows, divided by the net live weight production of cattle and calves. It includes the growth on dairy heifers and calves as well as all beef cattle.

⁴ For each 100 pounds live-weight production, about 19 pounds of wool was produced.

⁵ This should not be used as a measure of increased efficiency of feeding, as much feed was salvaged from waste feed in the early years.

⁶ Preliminary.

CHAPTER VII

DAIRY AND POULTRY STATISTICS

Dairy statistics in this chapter include series relating to many phases of production, movement, prices, stocks, and consumption of milk and its products. The distinct series of numbers of milk cows on farms included in this publication should not be confused. One series entitled "Cows and heifers 2 years old and older kept for milk, January 1" is an inventory number of this specific age-sex classification which is estimated as one of the major groups making up the total cattle population at the beginning of the year. The other series, identified as "Milk cows on farms," is an annual average number of milk cows during the year (excluding any not yet fresh) which is used in connection with determining milk production. More animals are represented in the first series than the latter because heifers 2 years of age which have not freshened are included.

In comparing the several series of milk prices, it is important to note that prices received by farmers for all whole milk sold are for milk or milkfat content as actually sold, while certain prices paid by dealers for milk for fluid purposes or for specified manufacturing purposes may be quoted on a 3.5 percent butterfat basis, or for some types of manufacturing milk on the test of the milk used for that particular purpose.

Poultry and poultry products statistics include inventory numbers of chickens by classes; the production, disposition, cash receipts, and gross income from chickens and eggs, poultry and egg receipts at principal markets; commercial broiler production, turkey production, disposition, cash receipts, and gross income; liquid and dried egg production; and the National Poultry Improvement Plan.

The estimates of chickens and turkeys on farms in census years differ from the census figures to the extent of the seasonal disappearance in numbers from January 1 to the average date of the enumeration. Estimates relating to inventories, production, and income exclude poultry and eggs which are produced on places not classified as farms.

¹ Includes studs, dairy, and beef sires.

² Includes dairy, and beef sires.

³ Prior to 1962 sires for which dam and daughter records had been compiled were designated as "proved" sires.

⁴ Beginning in 1962, herd mates were used instead of dams.

⁵ Prior to 1960 records of sires in artificial breeding service included records of both non-AI and AI progeny. Since 1960 records of sires in artificial breeding service include records of AI progeny only.

¹ Estimates include milk delivered to creameries, condenseries, cheese factories and market milk receiving stations, but exclude market milk sold to other farmers for local delivery.

² Approximations based on health officers' reports of sources of fluid milk in villages, towns, and small cities and information on sales by producer-distributors.

³ U.S. totals for milk disposition include allowances for Alaska and Hawaii.

Statistical Reporting Service.

¹ Preliminary.² Beginning 1960, includes Alaska and Hawaii.³ Includes ice cream, milk sherbet, ice milk, and miscellaneous minor frozen products.⁴ Milk equivalent of butter and condensed milk used in ice cream.⁵ Includes dry cream, malted milk dry part skim milk, dry ice cream mix, and cottage cheese.⁶ Includes net milk equivalent of butter and frozen dairy products to avoid double counting of milk from which fat was reused in making a second dairy product.⁷ Includes an allowance for fluid consumption on farms not producing milk in addition to the consumption on farms where milk is produced.⁸ Net movement of whole milk or cream into export or storage channels. A negative figure represents net imports or net out-of-storage movement during the year.⁹ Residual including miscellaneous minor uses and any inaccuracies of independently determined production and use items. For 1960-62 allows for all uses in Alaska and Hawaii, except fluid consumption.Statistical Reporting Service. Data for 1940-55 in *Agricultural Statistics, 1962*, table 566.

¹ Beginning 1960, includes Alaska and Hawaii.

² Preliminary.

³ Milk sold at wholesale and retail plus milk skimmed for sale as cream.

⁴ Computed from the value of milk and cream sold, divided by the quantity of milk or milkfat used in the preparation of these products for market.

⁵ Includes milk used for all butter churned on farms.

⁶ Milk utilized for household consumption valued in each State at average returns per 100 pounds for milk utilized in dairy products sold.

⁷ Value of milk and cream, plus the value of these products consumed in the household on farms where produced.

⁸ Milk produced on farms valued in each State at average returns per 100 pounds for milk utilized in dairy products sold. In addition to gross income, it includes the value of whole milk fed to calves.

Statistical Reporting Service. Data for 1935-52 in *Agricultural Statistics, 1962*, table 568.

FOOTNOTES FOR TABLE 564

¹ U.S. totals for milk disposition and income include allowances for Alaska and Hawaii.

² Milk sold to plants and dealers and retailed by farmers, plus milk skimmed for sale as cream.

³ Computed from the value of milk and cream sold divided by the quantity of milk or milkfat utilized in preparation of these products for market.

⁴ Milk used for fluid consumption and home-made butter on farms where produced valued at average per unit returns for milk utilized in all forms of sale.

⁵ Value of sales of milk and cream plus value of milk used for farm consumption and farm butter churned.

⁶ Milk produced on farms valued in each State at average returns per 100 pounds for milk utilized in dairy products sold. In addition to gross income, it includes the value of whole milk fed to calves.

Statistical Reporting Service.

¹ Simple average of monthly prices, by States, weighted by the number of milk cows on farms January 1 of the current year.

² Average price at average fat test for all milk sold at wholesale to plants and dealers, based on reports from milk market administrators, cooperative milk-marketing associations, whole-milk distributors, and milk-products manufacturing plants, f.o.b. plant or receiving station, whichever is the customary place for determining prices, before hauling costs are deducted and including all premiums.

³ Milk eligible for fluid market, including surplus diverted to manufacturing.

⁴ Weighted average of monthly prices, by States, weighted by the estimated quantity of fat sold.

⁵ Preliminary.

⁶ Monthly average prices and tests weighted by estimated sales in each month. Price f.o.b. factory or local receiving station, whichever is the customary place for determining prices, before hauling costs are deducted and including all premiums.

⁷ Includes milk for canned condensed milk.

Statistical Reporting Service. Data for 1940-52 in *Agricultural Statistics, 1962*, table 569.

MILK MARKETS

¹ Excludes producer-handlers who purchase no milk from other producers.
² Minimum uniform price in market pools; weighted average of dealers' blend prices in individual-handler pools; weighted average of base and excess payments where such payments are used.
³ Zone I.
⁴ 201-210 mile zone.
⁵ Phoenix.
⁶ Jackson, Meridian, Meadville, and Hattiesburg.
⁷ Abilene.
⁸ 55-70 mile zone.
⁹ 0-50 mile zone.
¹⁰ Polk County.
¹¹ November-December 1961.
¹² March-December 1961.
¹³ Base zone.
¹⁴ July-December.
¹⁵ June-December.
¹⁶ Memphis.
¹⁷ Zone II.
¹⁸ Greenville and Columbus.

¹⁹ Gulfport and Pascagoula.
²⁰ New Orleans and Houma.
²¹ Class I-A and I-B.
²² Lima.
²³ Cleveland, Akron, and Canton.
²⁴ Except for plants in Michigan or Wisconsin counties of Florence, Marinette, Oneida, Vilas, and Forest.
²⁵ Minden and Monroe.
²⁶ Oklahoma City.
²⁷ Springfield.
²⁸ District I.
²⁹ Except Dubuque and Jackson counties, Iowa, and East Dubuque, Illinois.
³⁰ Wichita Falls.
³¹ Albuquerque and Santa Fe.
³² Known as Rockford-Freeport January 1961-May 1962. Price reported at Rockford.
³³ October-December 1961.
³⁴ Huntington.
³⁵ August-December 1961.

Table 569.—Fluid milk: Dealers' average buying prices per hundredweight for milk for fluid milk use (3.5 percent milkfat basis), by regions, 1953-62¹

Year	New England	Middle Atlantic	East North Central	West North Central	South Atlantic	East South Central	West South Central	Mountain	Pacific	United States
	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>	<i>Dollars</i>

Ice milk ⁵	80,019	90,185	103,052	111,165	117,404	134,216	144,629	161,163

¹ Preliminary.² Excluding American full-skim cheese and cottage, pot and bakers' cheese.

³ Cottage cheese curd includes pot and bakers' cheese. Creamed cottage cheese contains not less than 4 percent milk fat while partially creamed cottage cheese contains less than 4 percent milkfat and is not legal in interstate commerce and in many States. Cottage cheese curd and creamed or partially creamed cottage cheese should not be added together to obtain a total cottage cheese figure. While a small quantity of cottage cheese curd is sold direct for consumption without further processing, a considerable part is creamed within the plant or shipped to another plant where creaming mixture is added prior to sale. Data for partially creamed cottage cheese not reported separately prior to 1957.

⁴ Less than 3 plants reporting.⁵ Includes freezer-make milkshake in most States.

Statistical Reporting Service.

FOOTNOTES FOR TABLE 574

¹ Preliminary.² Includes colby, washed curd, high and low moisture jack, Monterey and granular cheese.³ Excludes full-skim American and cottage cheese.⁴ Includes data for individual States which have less than 3 plants and are not shown separately.

Statistical Reporting Service.

¹ Includes fluid milk equivalent of cream. Excludes Alaska and Hawaii. The total apparent civilian consumption for the years 1949-62 was obtained by subtracting military takings from total fluid milk use. The per capita civilian consumption rates were obtained by dividing the total apparent civilian consumption by the number of persons eating out of civilian supplies.² Preliminary.Economic Research Service. Data for 1909-48 in *Agricultural Statistics, 1962*, table 585.

1962 ⁵	3,371	3,281	17.9	83	56	.31	1,898	975	5.3

¹ Excludes Alaska and Hawaii. Total disappearance is based on production, imports, and change in stocks during the year. Production statistics for these commodities appear in other tables in this chapter. The total apparent civilian consumption was obtained by subtracting ending stocks, shipments, exports, and military takings (1949-62) from the total supply. The per capita civilian consumption for each year was obtained by dividing the total apparent civilian consumption by the number of persons eating out of civilian supplies.

² Includes both farm and factory-made butter.

³ Includes all kinds of cheese except cottage, pot, and bakers' cheese, and full-skim American.

⁴ The evaporated milk is unskimmed, unsweetened, case goods. The condensed milk is unsweetened (plain condensed) unskimmed, bulk goods, and sweetened condensed milk, unskimmed, case, and bulk goods.

⁵ Preliminary.

¹ Does not include commercial broiler production. Beginning 1961, includes Alaska and Hawaii.

² Total chicks hatched less death loss of chickens and young chickens during the year.

³ Death loss during the year of mature chickens on hand Jan. 1.

⁴ Chickens raised less death loss during the year of mature chickens on hand Jan. 1.

⁵ Change in Jan. 1 inventory numbers during the year.

⁶ Chickens consumed in households of farm producers.

⁷ Preliminary.

⁸ Value of sales plus value of those consumed in households of producers.

Statistical Reporting Service. Data for 1935-52 in *Agricultural Statistics, 1962*, table 599.

¹ Data on cross-mated flocks are not truly indicative of the situation since in several States birds in such flocks are reported under the respective purebred heading and in some States those flocks are cross-mated only for a portion of the year to produce broilers; for the remainder of the year they are mated as purebreds for the production of purebred chicks.

Agricultural Research Service. Data for 1941-51 in *Agricultural Statistics, 1962*, table 602.

¹ Commercial broilers are young chickens of heavy breeds to be marketed at 2-5 pounds live weight and from which no pullets are kept for egg production. These figures are not included in farm production of chickens. Beginning 1961, includes Hawaii.

² Includes value of consumption in households of producers, which is less than 1 per cent of total production.

³ Preliminary.

Statistical Reporting Service. Data for 1934-49 in *Agricultural Statistics, 1962*, table 603.

¹ Excludes Alaska and Hawaii.

² Includes an allowance for nonfarm (backyard) production.

³ Shell-egg equivalent of eggs and egg products.

⁴ Shell eggs and shell equivalent of egg products, including exports made from Government-owned stocks acquired for price support and other purposes.

⁵ Estimated from number of chicks hatched.

⁶ Beginning in 1959, stocks exclude dried eggs.

⁷ Preliminary.

CHAPTER VIII

FARM RESOURCES, INCOME, AND EXPENSES

The statistics in this chapter deal with farms, farm practices, and the financial aspects of farming. Many of the series are estimates developed in connection with the research activities of the Department. Others are primarily records of operations, such as certain data from agricultural credit agencies.

For convenience, the tables have been arranged in general groups. These groups, with the beginning table indicated, are as follows:

- Farm property, table 626
- Population and employment, table 648
- Farm production and distribution, table 654
- Prices and income, table 678
- Costs and expenses, table 692
- Credit and loan programs, table 718
- Stabilization and price support programs, table 745

Thirteen new tables have been included in this chapter: Farms classified by tenure of operation in the United States; land utilization in farms and land not in farms, by States; liquid petroleum fuel used by farmers, giving numbers of selected machines, quantities of fuel used and fuel used in farm households by States and regions; also quantities used in tractors, and in farm households, and distribution by type of fuel, by regions; tractor use by average annual hours per tractor and distribution by months, by States. The new Rural Areas Development tables show number of R.A.D. committees, technical action panels, and projects under developments; technical and labor training in rural areas; and loans and grants in rural areas. The new A.S.C.S. tables show distribution of allotments by size groups for wheat; cotton; tobacco; and peanuts; also included is a table showing price support operations for dairy.

Two tables have been dropped: Index numbers of composite farm wage rates in the United States; and purchases and indemnity operations.

Table 626.—Economic trends: Data relating to agriculture, United States, 1949–62

1959.....	3,703,894	1,120,158	58.9	311,285	128,988

¹ 48 States, excluding Alaska and Hawaii.

² Acreages are for preceding year except for 1954 and 1959. Prior to 1925, this column shows the total acreage of crops for which figures are available, except for 1920, when 14,502,932 acres of corn cut for forage were excluded (most of this was probably duplicated in the acreage of corn harvested as grain). Beginning with 1925, the figures represent the total cropland harvested.

³ Estimates for 1950, 1954 and 1959 are based on a sample of farms.

⁴ Estimate derived from the index of farm real estate values applied to 1940 and 1950 Census values. 1945 Census reported a total value of land and buildings of \$46,389 million.

Economic Research Service. Compiled from reports of Census of Agriculture, U.S. Department of Commerce.

Other land outside farms (cities, roads, railroads, ungrazed wastelands, etc.) ⁷	130	131	137	149	144	155	160	341	390
Total land not in farms.....	916	848	844	763	745	746	782	1,111	1,147
Grand total ⁸	1,903	1,903	1,905	1,905	1,904	1,904	1,902	2,273	2,271

¹ Acreages classified as to use in preceding year except in 1954 and 1959.

² Cropland harvested, crop failure, and cultivated summer fallow.

³ Before 1945 acreage included in grassland pasture.

⁴ Open, or nonforested, permanent pasture in farms 1945-59. Before 1945 also includes cropland used only for pasture.

⁵ Land used chiefly for grazing. Includes open, or nonforested, grazing land, forest and arid woodland grazed, shrub and brush grazing land.

⁶ Excludes part of the forested areas in parks, wildlife refuges, military areas, recreation sites, and arid woodland, brushland, and forest land used for grazing.

⁷ Includes urban, industrial, and nonfarm residential areas; parks and wildlife refuges; military lands; roads, railroads, ungrazed desert, rock, swamp, and miscellaneous other areas.

⁸ Remeasurement and increases in reservoirs account for changes in total land area.

Economic Research Service. Data from reports of the U.S. Departments of Agriculture, and Commerce, and public land administering and conservation agencies.

FOOTNOTES FOR TABLE 631

¹ Cropland harvested, crop failure, and cultivated summer fallow.

² Excludes cropland used only for pasture.

³ Includes farmsteads, service areas, roadways, and unused areas such as open swamp, bare rock, sand dunes.

⁴ Includes open or nonforested grazing land, idle grassland, forest and arid woodland, and shrub and brush grazing land.

⁵ Excludes part of forest areas in parks, wildlife refuges, military areas, recreation sites, and arid woodland, brushland, and forest land used for grazing.

⁶ Includes urban, industrial, and residential areas, parks, wildlife refuges, military lands, roads, railroads, ungrazed desert, rock, swamp.

Economic Research Service. Data from reports of the U.S. Departments of Agriculture, and Commerce and public land administering and conservation agencies.

Table 631.—Land utilization: Land in farms and land not in farms, by States, 1959

¹ Indexes are based on deposits of member banks of the Federal Reserve System located in places of less than 15,000 population. Annual indexes are simple averages of monthly indexes which are based on average amounts of daily deposits. In preparing indexes of groups of States the amounts of monthly deposits for each State are weighted by the cash farm income of each State in the base period. Beginning with December 1959, U.S. Government deposits are excluded from the data on which the indexes for demand deposits are based. This change in method of reporting slightly lowers the levels of the indexes.

² Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, New York, North Carolina, North Dakota, Ohio, Oklahoma, Pennsylvania, South Dakota, Texas, Washington, and Wisconsin.

³ Michigan, Wisconsin, and Minnesota.

⁴ Ohio, Indiana, Illinois, Missouri, and Iowa.

⁵ North Carolina, South Carolina, Georgia, Alabama, Mississippi, Arkansas, Louisiana, and Oklahoma.

⁶ Mississippi, Arkansas, and Louisiana.

⁷ North Dakota, South Dakota, Nebraska, and Kansas.

⁸ Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, and Nevada.

¹ Excludes Alaska and Hawaii.

² Preliminary.

³ Preliminary with 1961, horses and mules are excluded.

⁴ Includes all crops held on farms and crops held off farms by farmers as security for Commodity Credit Corporation Loans. On Jan. 1, 1962, the latter totaled \$964 million.

⁵ Revised to take into account estimates of farm population based on the definition of a farm in the 1959 Census of Agriculture. This revision also adopts a method of making all calculations in constant dollars which are then converted to current dollars. Finally, it alters the method of estimating the value of inventory carried forward, and drops the adjustment for nonoperator families on farms that was an element of the old series. Values have been revised downward substantially in most years; for example, the previous estimates for 1955 were \$11.3 billion, and for 1959 \$13.1 billion.

⁶ Nonrecourse CCC loans secured by crops owned by farmers and included as assets in this balance sheet.

⁷ Loans of all operating banks, the production credit associations, and the Farmers Home Administration, and discounts of the Federal intermediate credit banks for agricultural credit corporations and live stock loan companies.

⁸ Loans and credits extended by dealers, merchants, finance companies, individuals, and others. Estimates based on fragmentary data.

Economic Research Service. Data for 1945-54 in *Agricultural Statistics, 1962*, table 639.

¹ Simple averages of monthly employment during the last full calendar week ending at least 1 day before the end of the month.

² Includes farm operators doing 1 or more hours of farm work and members of their families working 15 hours or more during the survey week without cash wages.

³ Includes all persons doing 1 or more hours of farm work during the survey week for pay.

Statistical Reporting Service. Data for 1910-48 in *Agricultural Statistics, 1962*, table 648.

Table 651.—Number of different persons who did any farm wage work during the year, average days worked and wages earned, United States, selected years, 1949-62¹

¹ Data relate to persons 14 years of age and over in the civilian noninstitutional population at or near the end of the year. No survey conducted in 1953 and 1955. This series differs from the hired workers series shown in table 650 which gives an annual average based on employment during the last week of each month.

² Includes Alaska and Hawaii.

Economic Research Service. Based on data from enumerative sample surveys made by the U.S. Department of Commerce for the Economic Research Service. Data for 1945-48 in *Agricultural Statistics, 1962*, table 649.

¹ Data relate to persons 14 years of age and over in the civilian noninstitutional population at or near the end of the year. Estimates not available for intervening years. Migratory workers are those who leave their homes temporarily to do farm wage work in another county or counties. Does not include foreign nationals brought into the United States to do farm work who have left the country before the time of the survey.

² Includes Alaska and Hawaii.

Economic Research Service. Based on data from enumerative sample surveys made by the U.S. Department of Commerce for the Economic Research Service.

¹ Includes harvested acreage of 43 crops for which separate planted estimates are not available. See footnote 7 in table 655.

² Count of 59 crops based on crops included from 1949–53. These are: all corn, all wheat, oats, barley, rye, buckwheat, flaxseed, rice, sorghum grain, sorghum forage and silage, cotton, hay, timothy seed, sweetclover seed, dry edible beans, dry field peas, soybeans for beans, cowpeas for peas, peanuts picked and threshed, sorgo for sirup, sugarcane, sugar beets, potatoes, sweetpotatoes, tobacco, broomcorn, artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons, honeydew melons, kale, lettuce, onions, green peas, green peppers, pimientos, shallots, spinach, tomatoes, and watermelons. Honeyball melons were dropped in 1954 and pimientos in 1956. The addition or dropping of crops generally has little effect on the total. Red clover seed, alsike clover seed, lespechea seed, and alfalfa seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage.

Statistical Reporting Service. Data for 1909–48 in *Agricultural Statistics, 1962*, table 653.

1962 ⁸	16,293	1,539	353	1,415.6	221.8	1,182	100,855	301,783

¹ Does not include Alaska and Hawaii.

² Includes acreage planted in preceding fall for harvest in the year shown.

³ Grain and sweet sorghums for all uses, including sirup, from 1949 through 1959; excluding sirup beginning with 1960.

⁴ Acreage seeded in preceding fall.

⁵ Preliminary.

⁶ Count of 43 crops based on crops included from 1949–53. These are: rye, hay, sweetclover seed, timothy seed, soybeans for beans, cowpeas for peas, peanuts picked and threshed, tobacco, sugarcane, broomcorn, and 29 commercial vegetables [all for processing: asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes; 28 for fresh market: artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons]. Honeyball melons were dropped in 1954 and pimientos in 1956. The addition or dropping of crops generally has little effect on the total. Alfalfa seed, red clover seed, alsike clover seed, and lespechea seed are included in the count of crops, but the acreage is not included because it is mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts picked and threshed, has been deducted. The harvested instead of the planted acreage of rye is included because most of the rye acreage not harvested is planted to other crops or used for pasture. Excludes grains cut for hay because part of the acreage shown as planted to wheat, oats, and barley is included in grain hay.

⁷ Includes crops listed separately in this table, plus those mentioned in footnote 6. (Sorghums counted as 3 crops—grain, forage, and sirup.)

Statistical Reporting Service. Data for 1934–48 in *Agricultural Statistics, 1962*, table 654.

¹ Does not include Alaska and Hawaii.² Preliminary.³ Asparagus, lima beans, snap beans, beets, cabbage (sauerkraut), sweet corn, cucumbers, green peas, pimientos, spinach, and tomatoes. Estimates for pimientos discontinued beginning with the 1956 crop.⁴ Count of 28 crops based on crops included from 1949-53. These are: artichokes, asparagus, lima beans, snap beans, beets, broccoli, brussels sprouts, cabbage, cantaloups, carrots, cauliflower, celery, sweet corn, cucumbers, eggplant, escarole, garlic, honeyball melons, honeydew melons, kale, lettuce, onions, green peas, green peppers, shallots, spinach, tomatoes, and watermelons. Honeyball melons were discontinued beginning with the 1954 crop. The addition or dropping of crops generally has little effect on the total. Excludes farm gardens. Acreage for harvest, including mature acreage abandoned or only partially harvested because of low prices or other economic factors.⁵ Totals are for crops shown in preceding columns. Alfalfa seed, red clover seed, alsike clover seed, and lespe-deza seed are included in the count of crops, but the acreage is not included because mostly duplicated in the hay acreage; the acreage of peanut hay, largely duplicated in peanuts picked and threshed, has been deducted. Other crops not included are hops, spelt, hemp, velvetbeans, various legumes and other crops harvested by livestock, minor crops, and fruits and nuts. The acreage shown include some crops harvested in succession from the same land.⁶ Commercial apples, peaches, pears, grapes, cherries, plums, prunes, apricots, figs, nectarines, olives, avocados, cranberries, dates, persimmons, pomegranates, oranges, tangerines, grapefruit, lemons, limes, tangelos (beginning with the 1955 crop), walnuts, almonds, and filberts.Statistical Reporting Service. Data for 1934-48 in *Agricultural Statistics, 1962*, table 655.

Total 78 crops ¹³											¹⁴ 19,740,276	¹⁴ 20,107,281

¹ Alaska and Hawaii included in commercial vegetables, but excluded from other crops. Total 59 crops harvested do not include Alaska and Hawaii.

² Preliminary.

³ Includes acreage seeded in preceding fall.

⁴ Acreage seeded in preceding fall.

⁵ Bags of 100 pounds (cleaned).

⁶ Acres grown alone, plus $\frac{1}{4}$ the interplanted acres.

⁷ All purposes.

⁸ Includes some quantities not harvested.

⁹ Includes sirup later made into sugar. Does not include production in nonfarm lands in Somerset County, Maine.

¹⁰ Fresh basis.

¹¹ For breakdown between fresh market and processing, see individual crop tables.
¹² Includes fresh market production equivalent tons in the shell and processing production equivalent tons shelled.

¹³ Includes crops listed in footnote 2, table 654. Farm value also includes apples, (commercial crop), peaches, pears, grapes, cherries, cranberries, oranges, grapefruit, lemons, limes, plums, all prunes, apricots, figs, olives, almonds, walnuts, pecans, maple products, and hops.

¹⁴ Total values do not include revisions made after December 1962 which are shown in this table.

Statistical Reporting Service.

¹ For cattle, sheep, and hogs, the quantity of net production is the live weight actually produced during the year, adjustments having been made for animals shipped in and changes in inventory.

² Excludes Alaska and Hawaii.

³ Preliminary.

⁴ Including commercial broiler production.

Statistical Reporting Service.

1962 ⁶	295	63	4	(⁵)	228	1.23	186

¹ Area in crops harvested (excluding duplication) plus acreages in fruits, tree nuts, and farm gardens.

² Acreages for exports relate to exports for year beginning July 1, or month representing beginning of crop season. Acreage includes seeds for crops and feed for livestock that are exported.

³ Includes products used by our military forces in this country and abroad, and by our domestic civilian population.

⁴ Includes persons in our military forces in this country and abroad.

⁵ Preliminary.

⁶ No data available but probably less than 1 million acres.

Economic Research Service. Data for 1910-48 in *Agricultural Statistics, 1962*, table 658.

1962 ⁶	100.0	75.9	10.0	13.6	.5	108.1	82.0	10.8	14.7	.6

¹ Quantity index using U.S. average farm prices in base period for weights among commodities, 1957-59 base period used starting with 1955, 1947-49 used earlier.

² Excludes domestic use of feed (which will appear in farm value of livestock) and seed (which is not available for other utilization).

³ Includes shipments from the mainland to Alaska and Hawaii when data are available.

⁴ Minus indicates decrease in stocks.

⁵ Less than 0.5 percent.

⁶ Preliminary.

Economic Research Service. Data for 1934-48 in *Agricultural Statistics, 1962*, table 660.

¹ Total persons supplied with agricultural products from United States farm production divided by farm employment. Total persons supplied in the United States is obtained by dividing value of farm production minus value of agricultural exports by per capita level of support. Total persons supplied abroad is calculated by dividing value of United States agricultural exports by per capita level of support in the United States. Per capita level of support is derived by dividing total population into value of farm production minus value of agricultural exports plus value of agricultural imports.

² Includes persons in our military forces in this country and abroad.

³ Preliminary.

1960 ⁷	12,144	9,636	3,744	2,472	16,194	12,414

¹ Includes Alaska and Hawaii.

² Reports of cooperatives are included either for the calendar year or for fiscal years ending between July 1 of the calendar year shown and June 30 of the following calendar year, with limited exceptions.

³ Includes independent local cooperatives, centralized cooperatives, and federations of cooperatives. Cooperatives are classified according to the activity in which they do more than 50 percent of their business.

⁴ Includes cooperatives whose major activity is providing services related to marketing and farm supply activities.

⁵ Includes members (those entitled to vote). Duplication exists as some farmers belong to more than one cooperative.

⁶ Charges for services in which no duplication occurs.

⁷ Preliminary.

⁸ Cooperatives report sales of each major commodity marketed, the value of each major type of supply purchased, and receipts from major types of services performed for patrons. Total marketing volume, therefore, consists only of the value of products actually marketed and farm supply volume consists only of the value of supplies purchased.

⁹ Includes intercooperative business.

¹⁰ Excludes intercooperative business.

Farmer Cooperative Service. Based on reports from cooperatives reporting to the Service. Data for 1934-49 in *Agricultural Statistics, 1962*, table 673.

Table 675.—Farmers' cooperatives: Number of marketing, farm supply, and related service cooperatives and business volume, United States, 1960-61 ¹ (preliminary)

¹ Includes Alaska and Hawaii.² Represents value at the first level at which cooperatives transact business for farmers.³ Includes coffee, forest products, fur pelts, hay, hops, nursery stock, tung oil, and other farm products not separately classified.⁴ Because many cooperatives do more than one type of business, these totals are less than the number that would be obtained by adding the number of cooperatives handling individual items or performing individual services.⁵ Charges for services in which no duplication occurs.

Farmer Cooperative Service. Based on records from cooperatives reporting to the Service.

1962 ⁵	85.67	51.46	34.21	60	44.93	7.36	37.57	16

¹ These estimates are for a market basket containing the average quantities of farm foods purchased per family by wage-earner and clerical worker families in 1952. The market basket contains the 7 groups of commodities shown in this table.

² Retail costs are calculated from retail prices published by the U.S. Department of Labor.

³ The farm values, or payments received by farmers for products equivalent to the foods in the market basket, are calculated from prices received by farmers. The farm values of processed products are adjusted by subtracting imputed values of byproducts. Payments to producers under provisions of the Sugar Act are not included. They amount to about 40 cents for sugar in bakery products and not more than 63 cents for sugar in the miscellaneous products group—a little more than \$1.00 for the market basket.

⁴ The farm-retail spread is the difference between retail cost and farm value. Taxes paid by sugar manufacturers on the quantity of sugar in the market basket amount to about 66 cents each year.

⁵ Preliminary.

¹ The retail-cost estimates represent cost at retail-store prices of all domestic farm foods that were both sold by farmers and bought by civilian consumers in this country. Farm food products sold in the form of meals are included but are valued at what the food would have cost in retail stores. Farm value is adjusted to eliminate imputed value of non-food byproducts. The marketing bill, or total marketing margin, is equal to the difference between the farm value and retail cost.

² Includes vegetable-oil products, sugar, and other miscellaneous food products in addition to the five commodity groups given in this table.

³ The estimated farm values of milk, eggs, fruits, lard, and vegetable shortening used in bakery products were deducted from the farm values of other commodity groups and added to the farm value of the bakery and cereal products group.

⁴ Preliminary.

Economic Research Service. Data for 1934-48 in *Agricultural Statistics, 1962*, table 679.

1962 ⁶	19.4	4.3	2.1	1.0	16.9	42.7

¹ The total marketing bill is the difference between total civilian expenditures for domestic farm-originated food products and the farm value or payment farmers received for the equivalent farm products. It relates only to domestic food bought by civilian consumers and not to that sold to the Armed Forces or exported. It differs from the farm-retail marketing bill of table 679 in which quantities of food sold in the form of meals are valued at retail-store prices.

² Does not include the cost of labor employed in intercity for-hire transportation because payments made for transportation also are compared with the total marketing bill.

³ Includes charges for the protective services, heating, and refrigeration; does not include local hauling; charges for intercity transportation by water and air are a part of the "other" or residual component of the marketing bill.

⁴ Does not include profits of unincorporated firms or firms engaged in intercity transportation.

⁵ Residual component; includes other costs such as advertising, depreciation, fuel, electric power, containers, packaging materials, air and water transportation, interest on borrowed capital, rents, noncorporate profits, and taxes other than Federal income taxes.

¹ Season average prices for crops and wool; weighted calendar year average for livestock and livestock products other than wool. Unless otherwise noted these are averages for marketing season or calendar year computed by weighting State prices by quantities sold, or by production for those commodities for which virtually all the production is sold. ² Effective parity prices as computed currently using base prices in effect and indexes for months indicated. Parity prices shown are those used in connection with a price support determination when applicable, otherwise for the month preceding the start of the crop marketing season for crops and for December of the previous year for livestock and livestock products. ³ Preliminary. ⁴ Following year.

⁵ Previous year. ⁶ State annual average prices weighted by production to obtain United States averages. ⁷ Average local market price for wool sold excluding incentive payment. ⁸ Price to Dec. 1. ⁹ Based on equivalent packing-house-door returns for Pacific Coast States and prices as sold for other States. ¹⁰ Equivalent per unit returns for bulk fruit at first delivery point.

¹¹ Prices for fresh use for important processing States and average prices for all methods of sale for other States. ¹² Packing-house-door returns for fresh consumption for Pacific Coast States, average prices for fresh use for New York and Michigan, and average prices for all methods of sale for other States. ¹³ Includes California dried prunes. ¹⁴ Prices include average Government payments to farmers authorized by the Sugar Acts. ¹⁵ Continental U.S. only. ¹⁶ Average price to Dec. 1 for all States except Louisiana which is a season average. ¹⁷ Includes some processing. ¹⁸ Simple average of States weighted by estimated Jan. 1 head for U.S. average. ¹⁹ Sold by farmers directly to consumers.

Statistical Reporting Service.

¹ Average prices at which the Commodity Credit Corporation supported agricultural commodities during the marketing year beginning in year shown. The mandatory commodity group indicates only those commodities for which support was mandatory during the later years. The summary excludes gum naval stores, surplus almonds (1961 only), and some crops which have not been supported in recent years.

² Average support shown for commercial area only. Support outside commercial area was 82.5 percent (in 1956) and 75 percent (in 1958) of the rate that would reflect the U.S. average level; in 1957 support was 70 percent of parity. The national average support rate in effect for farmers in the commercial area who were not in compliance with acreage limitations was as follows: 1956—\$1.25, 1957—\$1.10, 1958—\$1.06. For 1959 the support reflects 90 percent of the average price received by farmers (weighted by sales, by months, each calendar year) during the three calendar years 1956, 1957, and 1958, adjusted for unredeemed loans and for abnormal quantities of low-grade corn marketed from the 1957 crop.

³ Includes price support payments as follows: corn—18¢; wheat—18¢; barley—14¢; sorghum grain—29¢.

⁴ Basis $\frac{1}{8}$ Middling except 1961, 1962 and 1963 which are 1-inch Middling.

⁵ Choice A; choice B support; 1959—\$0.2470 and 1960—\$0.2318.

⁶ Minimum support; may be increased at beginning of marketing year if higher support is required.

⁷ Support price not available by each type at this time. Support announced as follows: cigar filler and binder (42-44), (53-55)—29.2¢; cigar binder (51-52)—40.4¢.

⁸ Price support mandatory in 1956, 1957 and in 1960-63. Grade No. 2 or better, except for oats which is Grade No. 3.

⁹ Loan rates basis grade (100), except in 1963. Producer rate \$4.00 less per ton.

¹⁰ Basis grade (100) for purchases from producers with appropriate differentials for purchases from ginners to reflect normal handling costs. No loan program in 1963.

Agricultural Stabilization and Conservation Service. Data for 1944-55 in *Agricultural Statistics, 1962*, table 682.

¹ Fresh market for noncitrus and fresh market and processing for citrus.² Includes interest, taxes, and farm wage rates. This ratio will not necessarily be identical to a weighted average percent of parity for all farm products largely because, pursuant to law, parity prices for some commodities are on transitional basis.³ Preliminary.

Statistical Reporting Service. The price series for individual commodities are averages for all classes and grades of the commodity being sold in local farm markets on or about the 15th of each month. In computing the group indexes, prices of individual commodities have been weighted by average quantities sold during 1937-41 through September 1952. From September 1952 forward, average quantities sold during 1953-57 were used. Data for 1934-48 in *Agricultural Statistics, 1962*, table 684.

1/2-ton, pickup ⁸	1,970.00	2,050.00	2,040.00	2,030.00	2,050.00
Tractors:					
Wheel, under 20 belt horsepower, each.....	1,610.00	1,680.00	1,680.00	1,660.00	1,660.00
Wheel, 20-29 belt horsepower, each.....	2,350.00	2,490.00	2,520.00	2,540.00	2,630.00
Wheel, 30-39 belt horsepower, each.....	3,070.00	3,100.00	3,060.00	3,090.00	3,280.00
Wheel, 40-49 belt horsepower, each.....		3,920.00	3,930.00	4,050.00	4,210.00
Wheel, 50-59 belt horsepower, each.....		5,040.00	5,000.00	5,180.00	5,390.00
Crawler, under 25 db. hp., each.....	3,280.00	3,430.00	3,600.00	3,660.00	3,730.00
Crawler, 25-34.9 db. hp., each.....	5,230.00	5,200.00	5,100.00	5,090.00	5,140.00
Crawler, 35-49.9 db. hp., each.....	7,260.00	7,240.00	7,280.00	7,450.00	7,620.00
Farm machinery:					
Flows, tractor, moldboard, two bottom, 14 inch, each.....	280.00	292.00	304.00	308.00	314.00

See footnotes at end of table.

Table 686.—Prices paid by farmers: Prices, by commodities, United States, average 1957-59, annual, 1959-62 ¹—Continued

Commodity and unit	Average	1959	1960	1961	1962
	1957-59				
	Dollars	Dollars	Dollars	Dollars	Dollars
Farm machinery—Continued					
Plows, tractor, moldboard, three bottom, 14 inch, each.....	418.00	446.00	465.00	484.00	500.00
Disk, harrows, tandem, 7 ft., each.....	321.00	338.00	344.00	352.00	359.00
Spiketooth harrows, steelbar, per section.....	36.00	37.80	40.00	42.60	43.70
Cultivators, 2-row, tractor, each.....	312.00	327.00	335.00	342.00	344.00
Corn planters, 2-row, plain, each.....	272.00	278.00	287.00	307.00	314.00
Grain drills, tractor-drawn, 16-tube, each.....	634.00	645.00	682.00	716.00	732.00
Grain drills, tractor-drawn, 20-tube, each.....	724.00	724.00	749.00	804.00	829.00
Mowers, tractor, 7-ft., each.....	394.00	421.00	434.00	452.00	468.00
Pick-up balers, automatic tie, P.T.O., each.....	1,820.00	1,890.00	1,880.00	1,910.00	1,950.00
Combines, self-propelled, 12 ft., each.....	6,320.00	6,600.00	6,700.00	6,750.00	6,930.00
Combines, 5-6 feet, P.T.O., each.....	1,800.00	1,900.00	1,970.00	2,020.00	2,150.00
Corn picker—huskers, 2-row, each.....	2,120.00	2,270.00	2,410.00	2,560.00	2,700.00
Hammer mills, each.....	273.00	286.00	292.00	270.00	276.00
Cream separators, electric, each:					
750 pound capacity.....	267.00	272.00	276.00	283.00	294.00
Single milkler units.....	131.00	133.00	130.00	134.00	137.00
Farm wagons, for rubber tires, less tires, each.....	184.00	189.00	191.00	191.00	192.00
Power sprayers, boom type, tr. mtd., each.....	196.00	201.00	217.00	224.00	234.00
Gas engines, 1½ horsepower, each.....	61.70	57.60	54.80	52.50	50.10
Electric motors, ¼ horsepower, each.....	20.30	20.40	20.80	20.70	20.65
Farm supplies:					
Axes, each.....	6.03	6.02	6.08	6.10	6.08
Hammers, each.....	3.28	3.39	3.49	3.53	3.58
Pitchfork, 3-tine, each.....	3.66	3.88	3.96	4.02	4.16
Pitchfork, 4-tine, each.....	4.41	4.62	4.68	4.77	4.88
Hoes, 7-inch blade, each.....	2.38	2.48	2.51	2.55	2.58
Milk cans, each.....	13.60	14.00	14.40	14.70	14.80
Milk pails, each.....	2.21	2.34	2.36	2.48	2.55
Rope, manila, per pound.....	.755	.764	.788	.817	.826
Binder twine, per pound.....	.235	.232	.238	.239	.243
New baskets, round stave, bushel, with cover, per dozen.....	4.67	4.70	4.73	4.69	4.78
Lead arsenate, per pound.....	.377	.379	.376	.393	.375
Paris green, per pound.....	.722	.751	.741	.774	.772
Calcium arsenate, per pound.....	.130	.136	.138	.144	.138
Fertilizer:					
Mixed fertilizer:					
0-20-20, per ton.....	64.30	64.90	65.40	65.50	66.90
2-12-12, per ton.....	42.70	43.20	44.00	45.20	46.00
3-9-6, per ton.....	42.40	41.20	42.00	42.60	43.80
3-9-9, per ton.....	42.40	45.80	48.80	51.60	53.80

Nitrate of soda, per ton.....	59.80	58.60	59.60	59.80	59.90
Sulphate of ammonia, per ton.....	59.30	58.80	57.80	58.40	56.90
Ammonium nitrate, per ton.....	81.80	81.60	81.20	82.10	81.40
Superphosphate, 20% P ₂ O ₅ , per ton.....	37.00	37.40	37.80	38.20	38.40
Superphosphate, 45% P ₂ O ₅ , per ton.....	78.40	78.70	79.80	80.20	79.90
Phosphate rock, per ton.....	21.40	21.60	21.00	21.20	20.80
Ammonium phosphate, 16-20, per ton.....	89.60	88.40	87.00	86.40	85.90
Muriate of potash, per ton.....	52.10	51.80	51.40	52.20	52.80
Agricultural limestone, per ton.....	4.55	4.62	4.66	4.67	4.75
Livestock:					
Feeders and stockers:					
Cattle and calves, per 100 pounds.....	23.10	25.70	23.30	23.30	24.50
Lambs, per 100 pounds.....	20.70	19.00	18.00	15.10	16.60
Hogs, per 100 pounds.....	18.50	15.40	16.60	17.80	18.10
Baby chicks, straight run, per 100.....	13.00	11.70	13.40	13.40	13.00
Turkey poults, each.....	.590	.565	.591	.583	.565
Feed:					
Alfalfa hay, baled, per ton.....	30.30	29.80	31.60	31.20	30.70
Other hay, baled, per ton.....	28.20	27.30	29.00	29.30	29.60
Cotton seed meal, per 100 pounds.....	3.95	4.15	4.04	4.06	4.29
Soybean meal, per 100 pounds.....	4.06	4.22	4.08	4.50	4.61
Linseed meal, per 100 pounds.....	4.14	4.74	4.41	4.42	5.04
Meat scrap, per 100 pounds.....	5.37	5.60	4.85	5.47	5.62
Tankage, per 100 pounds.....	5.57	5.74	4.88	5.64	5.81
Bran, per 100 pounds.....	2.86	2.92	2.86	2.94	3.03
Middlings, per 100 pounds.....	2.96	3.03	2.94	3.00	3.10
Mill run, per 100 pounds.....	2.73	2.83	2.72	2.78	2.92
Corn meal, per 100 pounds.....	3.27	3.18	3.10	3.07	3.08

See footnotes at end of table.

Table 686.—Prices paid by farmers: Prices, by commodities, United States, average 1957-59, annual, 1959-62¹—Continued

Commodity and unit	Average 1957-59	1959	1960	1961	1962
	Dollars	Dollars	Dollars	Dollars	Dollars
Feed—Continued					
Corn gluten, per 100 pounds.....	3.26	3.27	3.22	3.25	3.30
Hominy feed, per 100 pounds.....	3.26	3.21	3.14	3.18	3.21
Scratch grain, per 100 pounds.....	3.95	3.89	3.84	3.84	3.87
Layr feed, per 100 pounds.....	4.43	4.44	4.31	4.36	4.38
Broiler growing feed, per 100 pounds.....	4.90	4.84	4.62	4.64	4.67
Poultry ration cost, per 100 pounds.....	3.43	3.40	3.33	3.36	3.42
Chick starter, per 100 pounds.....	4.97	4.94	4.78	4.81	4.86
Dairy feed:					
Under 29 percent protein, per 100 pounds....	3.71	3.72	3.65	3.69	3.73
14 percent protein, per 100 pounds.....	3.75	3.79	3.64	3.54	3.59
16 percent protein, per 100 pounds.....	3.66	3.67	3.61	3.64	3.68
18 percent protein, per 100 pounds.....	3.63	3.62	3.57	3.65	3.71

24 percent protein, per 100 pounds.....	4.02	4.02	4.00	4.11	4.17
29 percent and over, protein, per 100 pounds....	4.40	4.49	4.41	4.47	4.58
Stock salt, per 100 pounds.....	1.58	1.60	1.61	1.63	1.63
Seeds:					
Barley, per bushel.....	1.88	1.85	1.81	1.76	1.88
Cowpeas, per bushel.....	5.97	7.10	6.93	6.54	6.73
Corn, hybrid, per bushel.....	11.00	11.20	11.30	11.50	11.70
Oats, per bushel.....	1.49	1.44	1.46	1.40	1.44
Potatoes, per 100 pounds.....	3.34	2.06	3.60	2.96	2.39
Rye, per bushel.....	2.46	2.21	2.11	2.22	2.36
Soybeans, per bushel.....	3.43	3.22	3.28	3.84	3.56
Wheat, per bushel.....	2.70	2.56	2.59	2.57	2.82
Alfalfa, common, per 100 pounds.....	37.70	36.30	38.70	37.60	49.40
Alfalfa, certified Grimm, per 100 pounds.....	45.90	46.40	49.60	47.10	57.40
Alsike clover, per 100 pounds.....	39.00	35.20	34.80	32.70	32.20
Red clover, per 100 pounds.....	45.70	46.80	42.10	37.00	46.10
Sweetclover, per 100 pounds.....	17.00	17.40	17.00	14.80	22.10
Lespedeza, Korean, per 100 pounds.....	12.80	12.10	14.10	21.60	20.40
Sudangrass, per 100 pounds.....	10.40	10.40	11.20	12.60	12.40
Timothy, per 100 pounds.....	24.20	26.70	21.10	15.30	17.30

¹ Annual average of prices at independent and chain stores. Prices paid by farmers are collected for the most part from retail establishments located in small cities, towns, and in rural areas through using questionnaires sent and returned by mail.

² Per 3 lbs.

³ Per Pint (16 fl. oz.).

⁴ Canister type.

⁵ 1957-59 average is for 4-door sedans. 1962 model designations include Ford Falcon, Chevrolet II, Plymouth Valiant, and Rambler. Comparable model designations are included for earlier years.

⁶ 1957-59 average is for 4-door sedans. 1962 model designations include Ford Galaxie, Chevrolet Bel Air, Plymouth Belvedere and Buick Special. Comparable model designations are included for earlier years.

⁷ Coverage includes Ford and Chevrolet.

⁸ Coverage includes Ford, Chevrolet, International and Dodge.

⁹ Averages prior to 1960 are for independent stores.

¹ Excludes Alaska and Hawaii. Farm population as of April 1 and total population as of July 1 are taken as the closest readily available approximations of their respective annual averages.

² Includes returns from farming operations to resident farm operators for the capital, labor and management, after deduction of farm production expenses. (There is no allowance in the item farm production expenses for a return on investment of farm capital.) Also includes farm wages and other labor income received by hired workers living on farms.

³ Includes all income received by farm residents from nonfarm sources such as wages and salaries from nonfarm employment, nonfarm business and professional income, rents from nonfarm real estate, dividends, interest, royalties, unemployment compensation and Social Security payments.

⁴ U.S. Department of Commerce.

¹ All except cotton farms in California and large-scale cotton farms in the Mississippi Delta are family-operated.

² Total sales plus Government payments, perquisites, and change in inventory of livestock and crops.

³ Includes all cash production expenditures plus depreciation and change in inventory of service buildings, machinery, and equipment.

⁴ Total value of farm capital, Jan. 1 times 4.1 percent, the average interest rate (1945-58) charged by Federal Land Banks on farm mortgage loans outstanding plus production credit times short-term interest rates charged by production credit associations on loans outstanding.

Economic Research Service.

¹ All except cotton farms in California and large-scale cotton farms in the Mississippi Delta are family-operated.

² Total sales plus Government payments, perquisites, and change in inventory of live-stock and crops.

³ Includes all cash production expenditures plus depreciation and change in inventory of service buildings, machinery, and equipment.

⁴ Total value of farm capital, Jan. 1 times 4.1 percent, the average interest rate (1945-58) charged by Federal Land Banks on farm mortgage loans outstanding plus production credit times short-term interest rates charged by production credit associations on loans outstanding.

Economic Research Service.

¹ Includes bulbs, plants, and trees.

² Includes expenditures for repairs and maintenance of farm buildings; petroleum fuel and oil, other motor vehicle operation, and repairs on other machinery.

³ Estimated outlay necessary, at current prices, for the replacement of capital equipment that has been used up during the year.

⁴ Includes cash wages, perquisites, and Social Security taxes paid by employers.

⁵ Includes taxes levied against farm real estate and farm personal property.

⁶ Interest charges payable during the calendar year on outstanding farm mortgage debt.

⁷ Data differ from those shown in table 692 in two ways: (1) they are net of depreciation allowance rather than cash outlay for building repairs and maintenance, and (2) they are net of farm mortgage interest in addition to the items covered in the production expenses series in table 692.

⁸ Includes short-term interest, pesticides, ginning, electricity and telephones (business share), livestock marketing charges (excluding feed and transportation), containers, milk hauling (1949 to date), irrigation, grazing, binding materials, tolls for sirup, horses and mules, harness and saddlery, blacksmithing and hardware, veterinary services and medicines, net insurance premiums (crop, fire, wind, and hail), and miscellaneous dairy, nursery, greenhouse, apinary, and other supplies.

⁹ Preliminary.

¹ Includes labor used on crops, livestock and overhead. Farm maintenance or overhead work includes time spent on fencing, repairs to buildings, machinery and equipment, farmwoods, pastures, general land maintenance farm business and other miscellaneous work.

² Includes wool and minor livestock which are excluded from separate enterprises shown.

³ Cattle and calves, sheep and lambs, and hogs.

⁴ Chickens, broilers, and turkeys.

⁵ Includes hay seeds, pasture seeds, and cover-crop seeds; farm gardens; and minor crops which are excluded from separate crops shown.

⁶ Corn for grain, oats, barley, and sorghum grain.

⁷ All hay, corn silage, and sorghum forage and silage.

⁸ All wheat, rye, buckwheat, and rice.

⁹ Potatoes, sweetpotatoes, dry edible beans, dry field peas, and truck crops.

¹⁰ Fruits, berries, and tree nuts.

¹¹ Sugar beets, sugarcane for sugar and seed, sugarcane sirup, and maple products.

¹² Soybeans, peanuts, flaxseed, and tung nuts.

¹ Includes Government distribution and secondary and trace-nutrient fertilizers but not liming materials.
² Calculated from the quantities of each grade and kind of fertilizer shipped and the analyses published by Fertilizer Control Authorities for the respective States.
³ Data for 1961 preliminary.
⁴ Includes Puerto Rico. The consumption of commercial fertilizer in other possessions is negligible.

1961 ³	16,102	7.01	13.48	12.17	25,333	13.34	10.90	8.92	1,291

¹ Includes Alaska, Hawaii, and Puerto Rico; also fertilizers distributed by Government agencies.

² Products not guaranteed to contain one or more of the primary nutrients. Includes gypsum but not liming materials.

³ Preliminary.

Agricultural Research Service. Data for 1929-48 in *Agricultural Statistics, 1962*, table 698.

Total	17,202,000	17,842,000	19,060,000	115,363,000	125,593,000	134,222,000
Sold for direct application to soil ⁵	592,000	546,000	493,000			

¹ Lime from oystershells included with quicklime from limestone.

² Value not quoted separately.

³ Used includes manufacture of superphosphate, phosphates, phosphoric acid, phosphorous, and ferro phosphorus; for direct application to the soil; as a fertilizer filler; stock and poultry feed; undistributed exports; and other minor uses.

⁴ Includes sintered matrix.

⁵ Included in total phosphate rock.

Economic Research Service. Compiled from reports of the U.S. Department of Interior.

¹ Contract rates on loans through Federal land bank associations. In computing the average rates, each Farm Credit district is given equal weight; within districts rates are weighted by the number of days in force.
² Based on bonds outstanding at end of each year. Beginning 1950 represents net cost to banks. Based on face rates prior to 1950. Excludes bonds owned by issuing agency.
³ Average market yields on representative outstanding issues.
⁴ Rates represent interest (less patronage refunds), service fees, cost of record searches, filing and releasing mortgages, etc., paid by borrowers, as percent of average loans outstanding during year.
⁵ Annual interest income on loans, discounts, and notes receivable as a percent of average balance of such items outstanding during the year.
⁶ Beginning 1950 represents weighted average net cost to banks of debentures issued each year. Based on face rates of debentures prior to 1950.
⁷ Excludes rates on loans secured by CCC documents.
⁸ Represents weighted average net cost to banks of debentures outstanding at end of each year. No debentures issued prior to 1950.
⁹ Board of Governors of Federal Reserve System. Annual averages of prevailing open-market rates in New York City.
¹⁰ Board of Governors of Federal Reserve System. Annual ranges in discount rates on advances secured by Government obligations maturing or callable beyond 1 year and discounts of and advances secured by eligible paper.

Economic Research Service and Farm Credit Administration. Data for 1929-48 in *Agricultural Statistics, 1962*, table 709.

¹ For companies with at least 50 percent of their insurance on farm property.

² Number of companies for which data could be obtained. Variations from year to year may not represent real variation in number of companies operating.

³ Excess of assets over liabilities. Most farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves.

⁴ Preliminary.

⁵ Estimates based on sample of companies; not available by States.

Economic Research Service. All data compiled from published State reports, supplemented by information from State insurance officials, officers of farmers' mutuals, and others. Data for 1929-48 in *Agricultural Statistics, 1962*, table 714.

FOOTNOTES FOR TABLE 715

¹ Preliminary. Includes companies with at least half of their insurance on farm property. In recent years, about 85 per cent of their total business has been on farm property. Data for some companies not available at time of publication.

² Number of companies for which data were obtained; not necessarily complete for any State.

³ Excess of assets over liabilities. Most farmers' mutuals are assessment companies and as such are not required to set up unearned premium reserves.

⁴ No mutual fire insurance company with as much as half of its insurance on farm property.

⁵ No farmers' mutual fire insurance companies in Alaska or Hawaii.

Economic Research Service.

¹ Excludes Alaska and Hawaii, except as indicated.² Includes regular mortgages, purchase-money mortgages, and sales contracts. Federal land bank and Federal Farm Mortgage Corporation mortgages in process of foreclosure were estimated for 1951 and 1952.³ Loans were made by the Land Bank Commissioner. Lending authority expired July 1, 1947. On June 30, 1955, loans of the FFMC were sold to the Federal land banks.⁴ Liquidation of the joint-stock land banks was completed April 26, 1951.⁵ Includes tenant-purchase, farm-enlargement, farm-development, project-liquidation, and direct soil and water conservation loans to individuals, and loans for these purposes from State Corporation trust funds.⁶ Compiled from reports of life insurance companies, "Best's Life Insurance Reports," "Spectator Life Insurance Yearbook," and data from Life Insurance Association of America and Institute of Life Insurance. Includes legal reserve companies only. Includes regular mortgages, purchase-money mortgages, and unpaid principal sales contracts.⁷ Includes all operating commercial, savings, and private banks. Also includes bank holdings of soil and water conservation loans and farm-ownership loans insured by the Farmers Home Administration.⁸ Amounts are residuals or differences between amounts reported by institutional lenders and estimates of total farm-mortgage debt. They roughly measure the farm-mortgage debt held by individuals and other non-reporting lenders.⁹ Beginning 1960, data for reporting lending institutions in Alaska and Hawaii are included. No estimates of total farm-mortgage debt for these States are available.¹⁰ Preliminary.Economic Research Service. Data for 1929-48 in *Agricultural Statistics, 1962*, table 718.

¹ Excludes Alaska, Hawaii, Puerto Rico, and U.S. possessions.² Loans on regular mortgages only, excluding purchase money mortgages and sales contracts. Beginning June 30, 1959, loans made by the Federal land banks include purchase money mortgages and sales contracts.³ For 1955 and earlier years, the data in this table on Federal land bank loans made differ from the data in table 730 only because Puerto Rico is excluded. Prior to 1956 the data on Federal land bank loans made in both this table and table 730 included the outstanding loan balance as well as new money advanced in a part of the cases where existing borrowers obtained additional loans. Beginning in 1956, however, an effort was made to include the outstanding balance in loans made for a larger number of existing borrowers obtaining additional loans. By 1958 the data in this table include all outstanding loan balances in cases where borrowers obtained additional financing.⁴ Loans by the Land Bank Commissioner were made on behalf of the Federal Farm Mortgage Corporation. Authority to make Land Bank Commissioner loans expired July 1, 1947, except for the limited purpose of refinancing loans previously made by the Land Bank Commissioner. Liquidation of Commissioner loans was completed June 30, 1955.⁵ Includes tenant purchase, farm enlargement, farm development, building improvement and project liquidation loans, loans primarily for refinancing purposes, and similar loans from State Corporation trust funds. Figures represent amounts advanced for project liquidation loans and amounts obligated for all other types of loans. Does not include insured farm ownership loans.⁶ Amount obligated. Data for 1950 include all loans obligated from beginning of farm housing program in November 1949. Beginning in 1961 rural farm housing is included in miscellaneous.⁷ Amount obligated. Does not include insured soil and water conservation loans.⁸ Estimates based on reports from counties including 30-50 percent of the farms in the United States. Includes purchase money mortgages and sales contracts to the extent they were recorded.Farm Credit Administration. Prepared in cooperation with the 12 Federal land banks. Data for 1929-48 in *Agricultural Statistics, 1962*, table 720.Table 720.—Farm mortgages: Loans made or recorded grouped by principal lenders, by geographic divisions, 1962¹

¹ Excludes Alaska and Hawaii.² Preliminary.Economic Research Service. Data for 1929-48 in *Agricultural Statistics, 1962*, table 722.

FOOTNOTES FOR TABLE 721

¹ Includes mortgages in process of foreclosure.² Includes United States legal reserve companies only. Includes regular mortgages, purchase-money mortgages, and sales contracts.³ Preliminary.⁴ Includes direct farm-ownership loans, direct soil and water conservation loans to individuals and rural-housing loans. Also includes direct farm-ownership loans made from State Corporation trust funds.⁵ Includes loans held by all operating commercial, savings, and private banks, individuals, and miscellaneous lenders. State estimates are approximate and should be used only as general indicators of the amount of mortgage debt held by this group. See table 726 for State data held by all operating banks (classified by location of bank rather than by location of security).⁶ Includes District of Columbia.

Economic Research Service.

¹ 48 States only. Real estate mortgages or deeds of trust are taken as supplemental security for some of these loans.

² All operating banks. Includes loans to individuals guaranteed by the Commodity Credit Corporation and certificates of interest in pool of growers' notes.

³ Loans "made" include renewals.

⁴ Excludes loans guaranteed by CCC, and loans held by associations in liquidation.

⁵ Excludes loans secured by CCC documents.

⁶ Loans "outstanding" are cumulative net advances minus principal repayments; loans "made" are net advances to borrowers.

⁷ Approximately $\frac{3}{4}$ of the individuals served by these cooperatives are farmers.

⁸ Principally loans to public bodies and to power companies.

⁹ Loans to commercial telephone companies.

¹⁰ Excludes pooled loans against which certificates of interest were issued and loans guaranteed by CCC held by other lending agencies.

Economic Research Service. Data for 1939-48 in *Agricultural Statistics, 1962*, table 725.

1956.....	3,308,443	4,420,483	6,290,568				

¹ Real estate mortgages or deeds of trust are taken as supplemental security for some of these loans.

² All operating banks. Excludes loans guaranteed by Commodity Credit Corporation.

³ All operating banks, production credit associations, other financing institutions discounting with the Federal intermediate credit banks, Farmers Home Administration, and CCC.

⁴ Includes loans held and guarantees of CCC to individual farmers only. Also includes estimated CCC non-real-estate loans for storage facilities and equipment.

⁵ Beginning 1960, includes Alaska and Hawaii; 48 States prior to 1960.

Economic Research Service. Data for 1929-48 in *Agricultural Statistics, 1962*, table 724.

¹ Includes loans of national and State commercial, mutual savings, stock savings, and private banks. Loans are classified according to location of bank and, therefore, are not strictly comparable with data for other lenders which are classified according to location of farm.

² Includes soil and water conservation loans insured by the Farmers Home Administration.

³ Includes loans guaranteed by the Commodity Credit Corporation and certificates of interest in pool of CCC loans.

⁴ Mariana Islands, Puerto Rico, Samoa (American), and Virgin Islands.

¹ In addition to data reported in this table, 1 insured labor housing loan for \$2,500 in 1961 and 3 for \$24,010 in 1962 were obligated. As of Jan. 1, 1963, \$12,021 was outstanding on the loans advanced. Also rural housing grants for \$654,979 were made.

² Includes tenant purchase, farm enlargement, farm development, building improvement, and project liquidation loans, loans primarily for refinancing purposes, and loans from Corporation trust funds.

³ Amount advanced for project liquidation loans and obligated for all other types of loans. Includes subsequent loans to borrowers who received an initial loan in a prior year.

⁴ In addition to the types of loans reported in the preceding column, includes amount outstanding on farm development (special real estate) loans from "Loans, grants, and rural rehabilitation" funds.

⁵ Loan advances less principal repayments.

⁶ Includes tenant purchase, farm enlargement, farm development and building improvement loans and loans primarily for refinancing purposes.

⁷ Amount obligated. Includes subsequent loans to borrowers who received an initial loan in a prior year.

⁸ Amount obligated less principal repayments for Jan. 1, 1949 and 1950; loan advances less principal repayments for Jan. 1, 1951-63.

⁹ Loans obligated from beginning of rural housing program in November 1949-December 1950.

Farmers Home Administration. Data for 1938-48 in *Agricultural Statistics, 1962*, table 735.

¹ Includes loans from Corporation trust funds.² Includes amount outstanding on production and subsistence, rural rehabilitation, construction and wartime adjustment loans and loans from Corporation trust funds.³ In October 1961, the various types of emergency loans consolidated into one designation "Emergency."⁴ In addition to current emergency loans, includes amount outstanding on production emergency, economic emergency, special emergency, fur, flood damage, flood and windstorm restoration loans, and loans made by Farm Credit Administration prior to the transfer of Regional Agricultural Credit Corporation funds to Farmers Home Administration on Apr. 16, 1949.⁵ Authority for making special livestock loans expired Dec. 31, 1961. The amounts reported are advances during 1962 for loans approved on or prior to Dec. 31, 1961. Loans approved after Dec. 31, 1961 which were advanced in 1962 for operating credit needs of borrowers indebted for special livestock loans are included in emergency loans.⁶ Less than \$500.

Farmers Home Administration.

¹ State totals represent data for borrowers incorporated within the State.

² Actual funds advanced out of loans in table 741.

³ Preliminary.

⁴ Includes data at time of repayment of loan for borrowers whose loans have been repaid in full. As of Jan. 1, 1963 there were 60 such borrowers with 17,786 miles energized and 104,795 consumers served.

⁵ Includes energy sales and revenues of power sold by one REA borrower to another.

⁶ Includes rural nonfarm and farm consumers.

¹ National acreage allotments proclaimed by the Secretary under the Agricultural Adjustment Act of 1938 except as follows: Cotton, peanuts, and rice national acreage allotments have been adjusted in certain years to include increases provided by special legislation; tobacco figures are a total of individual allotments, since a national allotment is not proclaimed for tobacco. In the case of wheat, entries do not include special adjustments, such as those for durum, required by special legislative provisions.² The commercial corn area included the following number of counties: 1950-837, 1954-834, 1955-805, 1956-840, 1957-894, and 1958-932.³ Other types of tobacco generally have been and are subject to allotments.⁴ Acreage allotments terminated.⁵ Suspended and replaced by 51 million acres base acreage.⁶ Preliminary.Agricultural Stabilization and Conservation Service. Data for 1938-48 in *Agricultural Statistics, 1962*, table 742.

All other ²			13.4		37.3
Special purchase programs ³			133.1		137.4
Total			3, 146.3		3, 626.7

¹ Price support extended is comprised of total loans made directly by Commodity Credit Corporation and through participating private lending agencies without regard to loan repayments or loan cancellation by forfeiture as well as direct purchase agreements entered into by Commodity Credit Corporation.

² Commodities included in "all other" for 1961 and 1962 crops are cottonseed, extra long staple cotton, flaxseed, honey, rye, and tung oil. In addition, the 1961 crop includes almonds.

³ Commodities included in "special purchase programs" for 1961 and 1962 crops are corn meal, wheat flour, rolled wheat, fluid milk for Armed Services and Veterans Administration, and vegetable oil products. In addition, in 1962 crop included milled rice.

Agricultural Stabilization and Conservation Service.

¹ Includes loans made directly by Commodity Credit Corporation and loans made by banks and other lending agencies under CCC obligation to purchase. As far as possible, loans have been distributed according to the location of producers receiving the loans. Direct loans to cooperative associations for the benefit of members have been distributed according to the location of the association.

² Includes loans to cotton cooperatives and the 1933 cotton loan for which State data are not available.

³ Includes storage facility and equipment loans.

Agricultural Stabilization and Conservation Service.

¹ Sales do not reflect donations under Sections 416, 407 and 202, Agricultural Act of 1949, Public Law 439 and donations under other authorities.

² Negative item due to adjustment applicable to prior year.

³ Less than 500.

⁴ Processed from price support shelled peanuts.

⁵ Processed from price support wheat.

⁶ Processed from price support butter.

⁷ Transferred to CCC at no cost from National Stockpile, pursuant to Public Law 85-96, 85th Congress. The proceeds from sales less cost incurred by CCC are covered into the Treasury as miscellaneous receipts, therefore, such proceeds and costs are not reported in the operating accounts.

⁸ Acquired from price support program.

Agricultural Stabilization and Conservation Service.

¹ Includes some sales which may be applied subsequently to barter contracts or P.L. 480, Title I authorizations. Any such reclassification will cause downward adjustment "Dollar Sales—Export."

² Includes donations under Section 202, 407 and 416, and miscellaneous donation under various other authorizations.

³ Commodities delivered as payment-in-kind for exportation under P. L. 480 are included in P.L. 480 (Export) Title I column.

⁴ Includes sales to Section 32 at lower of cost or market for distribution to relief and other welfare outlets.

⁵ Unrestricted use; includes sales for payment-in-kind certificates issued under the 1961 Feed Grain Program.

⁶ Under \$500.

⁷ Negative item due to adjustments applicable to prior years.

⁸ Includes dispositions under P.L. 480, Title IV, cost \$3,629.

Agricultural Stabilization and Conservation Service.

¹ Farm value included under Florida grapefruit above.
Agricultural Marketing Service.

CHAPTER IX

AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS

Statistics in this chapter concern conservation of various resources, particularly soil, water, and timber. Data on the production, supply, and distribution of Naval Stores is included because of its close association with forestry statistics.

The table for watershed protection projects has been combined with the flood prevention table in this issue.

Table 765.—Agricultural Conservation Program: Assistance to farmers for carrying out conservation practices, United States, by program years, 1936-62¹

Program year	Assistance	Program year	Assistance
	<i>1,000 dollars</i>		<i>1,000 dollars</i>
1949	223, 855	1956	222, 032
1950	252, 006	1957	216, 154
1951	246, 100	1958	219, 896
1952	227, 650	1959	210, 296
1953	190, 496	1960	213, 488
1954	146, 949	1961	238, 892
1955	192, 602	1962 ²	221, 128

¹ Includes assistance under the Naval Stores Conservation Program. Administrative expenses are not included. Includes assistance for supplemental (emergency) practices since 1951. ² Preliminary.

Agricultural Stabilization and Conservation Service. Data for 1936-48 in *Agricultural Statistics, 1962*, table 757

¹ Turpentine places under Naval Stores Conservation Program not included in "participating farms" but number of payees included in "payees." Farms participating in pooling agreements are included in "participating farms" but only the managers are included in "payees." Also includes data with respect to supplemental (emergency) practices.

² Cropland on participating farms as percentage of the cropland acreage in States. Includes data with respect to supplemental (emergency) practices.

³ Does not include funds for Naval Stores Conservation Program.

⁴ \$500 or less.

¹ Includes supplemental (emergency) practices. ² Includes only the acreage across which terraces have been constructed. ³ Includes surfacing clod-forming subsoil to control wind erosion. ⁴ Extent applies only to that acreage on which the practice performance completed under the 1961 Agricultural Conservation Program provided adequate drainage facilities. Does not include data relative to drainage systems damaged by flood which were restored under the Agricultural Conservation Program. ⁵ All liming materials have been converted to a standard ground limestone equivalent.

Agricultural Stabilization and Conservation Service.

¹ Fiscal year, July 1 to June 30.

² Totals at the end of each year are net, including corrections and adjustments made during the year.

³ Includes wind erosion districts, grazing districts, and Imperial Irrigation District (California).

⁴ Adjusted to the 1950 Census of Agriculture.

⁵ Includes grazing districts and Imperial Irrigation District (California).

⁶ Adjusted to the 1954 Census of Agriculture.

⁷ Includes grazing districts, Imperial Irrigation District (California), and Elephant Butte Irrigation District (New Mexico).

⁸ Adjusted to the 1959 Census of Agriculture.

Fire crew station sites.....	do.....			
Building for fire protection work (barracks, cabins, warehouses, garages, offices, misc.).....	do.....			98
Pumps.....	do.....			18
Radios (mobile and stationary).....	do.....			376
Mobile equipment.....	do.....			138
Helispots and heliports.....	do.....	4	7	388
Stabilization of roadsides.....	Miles.....			348.2
Revegetation—cover improvement:				
Seeding and planting—trees and shrubs.....	Acres.....	66,460	85,606	422,016
Emergency seeding following fire.....	do.....	40,185	11,527	360,751
Mountain channel control:				
Barriers.....	Number.....	20	27	208
Planting.....	Square yards.....			306,560
Channel clearing.....	Acres.....			74
Channel stabilization.....	Linear feet.....	31,738	17,741	77,780
Forest management: Owner participation.....	Number.....	5,567	8,638	28,438

¹ Covers work in following watersheds: Buffalo Creek, Coosa River, Little Tallahatchie, Los Angeles, Potomac, Santa Ynez and Yazoo.

² These principal physical works of improvement have been installed and major fire protection equipment items acquired for watershed improvement purposes under the Flood Control Acts by the Forest Service and Cooperating State agencies.

Forest Service.

568 AGRICULTURAL CONSERVATION AND FORESTRY STATISTICS, 1963

Table 779.—Watershed protection ¹ and flood prevention projects: ² Works of improvement installed with the assistance of the Soil Conservation Service in fiscal year 1962 with watershed protection and flood prevention funds

Item	Unit	Pilot and P. L. 566 watersheds	Flood prevention watersheds
Projects in operation during year:			
Pilot watersheds.....	Number.....	16	
P. L. 566 watersheds.....	do.....	346	
Flood prevention watersheds.....	do.....		11
Works of improvement installed:			
Structural measures:			
Floodwater retarding structures.....	Number.....	117	163
Grade stabilization structures.....	do.....	107	310
Channel stabilization.....	Miles.....	1	4
Channel improvement.....	do.....	74	17
Levees and dikes.....	do.....	1	
Critical area planting.....	Acres.....	2, 882	8, 018
Land treatment measures:			
Contour farming.....	do.....	57, 978	221, 646
Cover cropping.....	do.....	91, 183	160, 886
Crop residue utilization.....	do.....	213, 861	342, 973
Debris basins ³	Number.....	196	591
Diversion construction.....	Miles.....	37	96
Pasture planting.....	Acres.....	46, 522	78, 592
Pond construction.....	Number.....	359	303
Range seeding.....	Acres.....	7, 126	9, 304
Stripcropping.....	do.....	4, 117	1, 825
Stubble mulching.....	do.....	9, 737	13, 412
Terracing.....	Miles.....	523	495
Tree planting.....	Acres.....	4, 356	1, 347
Waterway development.....	do.....	876	793
Wildlife development.....	do.....	2, 863	1, 387
Woodland planting.....	do.....	624	735
Intermediate cutting.....	do.....	5, 527	2, 128
Structures for water control.....	Number.....	227	5

¹ As authorized by the Soil Conservation Act of 1935 (Public Law 46, 74th Congress) implemented by the watershed protection item in the Department of Agriculture Appropriation Act of 1954 and Watershed Protection and Flood Prevention Act P. L. 566 as amended in 1956 by P. L. 1018.

² All of the 11 watersheds were approved December 22, 1944, however, flood control funds did not become available for works of improvement until 1946.

³ Includes some basins constructed as structural measures.

Soil Conservation Service.

¹ Includes national forests, purchase units, experimental areas and land utilization projects.

National forests.—Areas established as national forests by legislative or executive action. Acres shown as national forest land, and other land administered by the Forest Service include small administrative sites outside of proclaimed boundaries and those portions of land utilization projects and other areas over which the Forest Service has supervision located within the national-forest boundaries. Land utilization and other areas located outside the national forests and under Forest Service supervision are not included; such areas are listed under the classifications "Land utilization projects" and "Other areas."

Purchase units.—Areas established by the Secretary of Agriculture with the concurrence of the National Forest Reservation Commission but not formalized by legislative or executive action. Acreage shown as national forest land, and other land administered by the Forest Service include all administrative sites outside the established boundaries and those portions of the land utilization projects and other areas, over which the Forest Service has supervision located within the established purchase unit boundaries. Land utilization and other areas located outside the boundaries and under Forest Service supervision are not included; such areas are listed under the classification "Land utilization projects" and "Other areas."

Experimental areas.—Areas outside of the exterior boundaries of national forests or purchase units which have been reserved and dedicated to forest or range research and experimentation by legislative or executive action. The Massabesic Experimental Forest in Maine and the McNeill Division of the Harrison Experimental Forest in Mississippi, which have both purchase unit and experimental area status, are included only in the experimental area summaries.

Land utilization projects.—Lands outside the national forests and purchase units that are administered by the Forest Service in pursuance of certain national programs of land utilization and adjustment. Does not include land utilization project lands that are managed by the States or State agencies under lease or cooperative license agreement.

² Lands within the unit boundaries in private, State, county, and municipal, etc., ownership, and Federal lands over which the Forest Service has no jurisdiction.

Forest Service.

¹ Includes all products, except fuelwood, commonly cut from round sections of trees.

² Includes small quantities of imported fuelwood.

³ Includes cooperage logs, poles and piling, fence posts, hewn ties, round mine timbers, box bolts, excelsior bolts, chemical wood, shingle bolts, and a miscellaneous assortment of similar items.

⁴ Net imports of lumber converted to cubic feet roundwood. Small quantities of imported saw logs (roundwood form) are included under domestic production.

⁵ Columns may not add to total because of rounding.

⁶ Includes changes in stocks.

⁷ Net imports of veneer logs represent the equivalent net imports of veneer and plywood converted to board feet long scale, and then to cubic feet roundwood. The small volume of veneer logs imported (roundwood form) are included under domestic production.

⁸ Includes net pulpwood imports (in roundwood form) and the pulpwood equivalent of the net woodpulp and paper and paperboard imports.

⁹ Less than 2.5 million cubic feet.

¹⁰ Preliminary.

¹ Rosin, not for violins; imports for consumption, as reported by the U.S. Department of Commerce.

² Drums of 520 pounds net weight.

³ Less than 500 drums.

⁴ The breakdown between gum and wood rosin imports not available.

⁵ Reports of the U.S. Department of Commerce.

⁶ Total supply less exports and March 31 stocks.

⁷ Due partly to unreported industrial consumption and partly to failure of some consumers to distinguish in their reports between gum rosin, wood rosin, and modified or derived rosin.

Statistical Reporting Service. Data for 1932-48 in *Agricultural Statistics, 1962*, table 791.

CHAPTER X

CONSUMPTION AND FAMILY LIVING

The statistics in this chapter deal with the consumption of food by both rural and urban people, retail price levels, and other aspects of family living of farm people. Data presented here on quantities of food available for consumption are based on material presented in the earlier commodity chapters, but they are shown here at the retail level, a form that is more useful for an analysis of the demand situation faced by the producer. Data on quantities of farm-produced food consumed directly by farm households are presented in the commodity chapters. Its value and the rental value of the farm home are given in the section on farm income, table 687.

Two new tables have been included in this chapter: Suggested weekly food quantities at three cost levels; and food cost at home at three cost levels.

Two tables have been dropped: Practices in food preparation and consumption; and the table on consumption per farm and cost for electric energy.

¹ These indexes are based on the following data from the 1950 and 1959 Censuses of Agriculture: (1) Average value of sales per farm; (2) average value of land and buildings per farm; (3) percentage of farms with telephones; (4) percentage of farms with home freezers; and (5) percentage of farms with automobiles. The index for a given area is the unweighted average of the indexes for all counties or combinations of counties in that area. The indexes are not comparable to those previously published. U.S. county average in 1959=100.

² Excludes Hawaii.

Economic Research Service.

1962 ³	80	122	218	105	83	96	88	111	93	103

¹ Derived from data on per capita consumption of individual foods, using estimates of retail weights multiplied by average retail prices in 1947-49. Data prior to 1958 subject to revision resulting from 1959 census of Agriculture.

² Fat cuts of pork are in the "meats, poultry, fish" group.

³ Preliminary.

⁴ Includes frozen vegetables, canned soups, and canned baby foods.

Economic Research Service. Data for 1919-48 in *Agricultural Statistics, 1962*, table 796.

¹ Estimated from per capita data by means of average loss factors, with the addition of estimates of supplies from rural and urban home gardens and of minor food items. Civilian consumption only. Excludes Alaska and Hawaii.

² Fluid whole milk equivalent based on calcium content. One quart of fluid milk weighs 2.15 pounds.

³ Sum of approximate retail weights.

⁴ Allows for breakage from farm to retail.

⁵ Excludes bacon and other fat pork cuts; includes edible offal, game, and small quantity of noncommercial fish. Poultry on ready-to-cook basis; meat on fresh-retail-cut equivalent.

⁶ Product weight except for "other edible fats and oils," which represents oils used in salad dressings, etc.

⁷ Nuts on a shelled basis.

⁸ Includes fresh and processed items and produce of rural and urban home gardens. Product weight except for concentrated citrus juices which are on a single strength basis.

⁹ Excludes corn sugar and sirup.

¹⁰ Excludes sugar used in condensed milk, frozen dairy products (except ice cream), and processed fruits and vegetables.

¹¹ Includes coffee on roasted basis and chocolate liquor equivalent of cocoa and chocolate products.

¹² Preliminary.

Economic Research Service. Data for 1909-48 in *Agricultural Statistics, 1962*, table 797.

¹ Quantities of nutrients computed on the basis of estimates of apparent per capita consumption (retail basis), including estimates of produce of rural and urban home gardens. No deduction has been made in nutrient estimates for loss or waste of food in the home or for destruction or loss of nutrients during the preparation of food. Civilian per capita only. Excludes Alaska and Hawaii.

² Includes estimates of the quantities of these nutrients added to prepared cereals, white flour, and bread.

³ Preliminary.

Agricultural Research Service. Data for 1909-48 in *Agricultural Statistics, 1962*, table 798.

¹ In the development of the plans the following criteria were applied: (1) nutritional adequacy; (2) the relative nutritional economy of the different food groups; (3) the suitability of the food in relation to meal patterns common in the U.S. ² Fluid whole milk, or its calcium equivalent in milk products.

³ Includes bacon and salt pork. ⁴ Weight in terms of flour and cereal.

¹ Estimated from food quantities shown in table 807 by using the average price per pound of each food group paid by nonfarm survey families at three selected income levels in 1955, and adjusting to current levels by use of "Retail Food Prices by Cities" (46 cities combined) released periodically by the Bureau of Labor Statistics.

² Ten percent added for family size adjustment.

³ Man and woman 20 to 34 years; children, 1 to 3 and 4 to 6 years.

⁴ Man and woman 20 to 34 years; children, 7 to 9 and 10 to 12 years.

⁵ The costs given are for individuals in 4-person families. For individuals in other size families, the following adjustments are suggested: 1-person—add 20 percent; 2-person—add 10 percent; 3-person—add 6 percent; 5-person—subtract 5 percent; 6-or-more-person—subtract 10 percent.

¹ In this tabulation, "peak participation" is the participation during the month of the year when the largest number of persons participating in the program; "average participation" is the average for the 12 months of the fiscal year.

² A subsidy program to expand markets for agricultural products, maintain outlets for Section 32 commodities and support school lunch programs. Sponsors of school lunch programs are reimbursed by the Government for local purchases of food on basis of the quality and quantity of meals served. The program was started in February 1943.

³ Distribution, without charge to recipients, of food commodities acquired by the Government and distributed under provisions of Section 32, Public Law 320, 74th Congress, approved Aug. 24, 1935, as amended; under Section 416, Public Law 439, 81st Congress, as amended; and under Section 6 of the National School Lunch Act, Public Law 396, 79th Congress, approved June 4, 1946. Distribution to ultimate eligible recipients is accomplished through cooperating distributing agencies in States. Eligible recipients include school lunch programs, eleemosynary institutions, and households receiving public assistance from State or local welfare agencies.

¹ The number of farms receiving central station electric service from REA borrowers and all other suppliers as of June 30, 1962, is based on the annual estimate of electrified farms made by REA. Although not strictly comparable, this estimate is shown as a percentage of the total number of farms estimated for 1961 by the Statistical Reporting Service, U.S.D.A.

Rural Electrification Administration.

¹ State data are for cooperatives and commercial telephone companies which are borrowers headquartered in the State even where borrowers operate in more than one State.

² Includes route miles of line to be constructed or rebuilt.

³ Excludes route miles of line to be rebuilt.

Rural Electrification Administration.

CHAPTER XI

MISCELLANEOUS AGRICULTURAL STATISTICS

This chapter contains miscellaneous data which do not fit into the preceding chapters. Included here are summary tables on foreign trade in agricultural products; tables on acreage and production of world crops, weather data pertaining to farming; statistics on fishery products; tables on frozen food locker plants, refrigerated warehouses and data on freight rates on transportation of agricultural products, and Hawaiian statistics on land utilization, marketings and value of crops and livestock; and livestock numbers. One weather table is included in this issue: The two tables showing monthly and annual 30-year normals, by climatic divisions, for precipitation and for average temperature, carried in the 1962 issue will be repeated about every five years. The current table showing annual averages for precipitation and temperature, by climatic divisions, will be carried annually. More complete information can be secured from the Weather Bureau, U.S. Department of Commerce.

Foreign Trade in Agricultural Products

The term "foreign trade" applies to trade between the United States, including its territories, and foreign countries. Trade between continental United States, and its territories is referred to as "shipments." Puerto Rico, Guam, and the Virgin Islands are territories. Beginning January 1, 1940, trade with foreign countries through the customs district of the Virgin Islands is not included in United States trade statistics. Figures for shipments out of the territories include small quantities to other territories. In statistics of foreign trade, forest products and distilled liquors are considered nonagricultural products, as distinct from strictly agricultural products.

Separate figures are not being compiled by the U.S. Department of Commerce on exports under various special economic-aid programs, but these exports are included in figures appearing in this publication. Excluded from the export figures are shipments to the United States armed forces abroad for their own use, shipments between continental United States and the territories and possessions, and shipments between the territories and possessions. Effective January 1, 1950, also excluded from the dollar value is the export subsidy paid to private United States exporters on shipments of domestically produced agricultural commodities. The export subsidy programs have included the following commodities: Wheat, wheat flour, raisins, prunes, apples, oranges, canned juice, honey, cotton, unshelled filberts, and fresh pears.

Imports for consumption include imports for immediate consumption plus withdrawals from bonded warehouses. In the classification of agricultural import products into supplementary and complementary groups, all those similar to agricultural commodities produced commercially in the United States and all others that are interchangeable in use to any significant extent with such United States commodities are considered supplementary. Complementary includes all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

Table 821.—Foreign trade: Value of total agricultural exports and imports, United States, 1949-61

Year beginning July	Total domestic exports	Agricultural exports ¹			Total imports for consumption	Agricultural imports (for consumption)					Excess of domestic agricultural exports over supplementary imports

¹ Agricultural exports include "food exported for relief or charity by individuals and private agencies." These figures include a small amount of certain foodstuffs other than agricultural.

² Supplementary agricultural imports consist of all imports similar to agricultural commodities produced commercially in the United States, together with all other agricultural imports interchangeable to any significant extent with such United States commodities. Complementary agricultural imports include all others, about 95 percent of which consist of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ Preliminary.

¹ Preliminary.

² Supplementary agricultural import products consist of all products similar to agricultural commodities produced commercially in the United States, together with all other agricultural products interchangeable to any significant extent with such United States commodities. Complementary agricultural products include all others, about 95 percent of which consists of rubber, coffee, raw silk, cacao beans, wool for carpets, bananas, tea, and spices.

³ Imports include horses and mules for immediate slaughter and teams owned by immigrants.

⁴ Less than 500.

⁵ Includes olives in brine; pineapples, prepared and preserved; and mandarin oranges.
⁶ Excludes corn, barley, oats, grain sorghums, and wheat (unfit for human consumption).

⁷ July-December only.

⁸ Not separately classified.

⁹ Includes imports through customs district of Puerto Rico.

¹⁰ Includes a small amount of certain foodstuffs other than agricultural.

Economic Research Service. Compiled from reports of the U.S. Department of Commerce.

¹ Foreign donations are authorized under Sec. 416 of the Agricultural Act of 1949 and Sec. 302, Title III, PL 480.

² The barter program is authorized under the Charter Act of the Commodity Credit Corporation; Sec. 303, Title III, PL 480; and other legislation.

³ Agricultural exports excluding government programs (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) extension of credit for relatively short periods, (2) sales of Government-owned commodities at less than domestic market prices, and (3) export payments in cash or in kind.

⁴ Less than \$50,000.

¹ Foreign donations are authorized under Sec. 416 of the Agricultural Act of 1949 and Sec. 302, Title III, P. L. 480.

² The barter program is authorized under the Charter Act of the Commodity Credit Corporation; Title III, P. L. 480; and other legislation.

³ Agricultural exports excluding government programs (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) extension of credit for relatively short periods, (2) sales of Government-owned commodities at less than domestic market prices, and (3) export payments in cash or in kind.

⁴ Less than \$50,000.

Economic Research Service.

¹ Unless otherwise indicated, the years shown refer to years of harvest in the Northern Hemisphere countries. Harvests of Northern Hemisphere countries are combined with those of the Southern Hemisphere which immediately follow; thus, the crops harvested in the Northern Hemisphere in 1961 are combined with Southern Hemisphere harvests which begin late in 1961 and end in the first half of 1962.

² Preliminary.

³ Includes cider.

⁴ Foreign production in equivalent boxes; oranges 70 pounds; grapefruit 80; lemons 76.

⁵ Year beginning January 1.

⁶ Eight leading countries.

⁷ Excludes Mainland China.

⁸ 1956-60 average.

Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source materials, reports of U.S. Agricultural Attachés and Foreign Service Officers, results of office research and related information.

¹ Transportation bill for all years and revised railroad freight rate indexes are on a calendar year basis.

² Estimates of total expenditures by shippers for transportation (except local hauling) of farm products for civilian consumption by rail and truck, including private trucks. Year-to-year variations are caused by changes in rates, changes in volume shipped, length of haul, and some additional minor factors.

³ All index number series are of the weighted aggregative type. They are based upon averages of rates in effect during the year. Annual averages are computed by weighting the applicable monthly rates by the estimated proportion of annual shipments moved thereon, assuming an average seasonal distribution of shipments. In constructing the combined index, group indexes were weighted by average revenues for 1957–59.
